Absorption of Radiation (see **Optical Properties; Radiation**)

Acoustics
- Broadening of spin-phonon resonance lines by exchange and magnetic dipole interactions, Rodney Loudon—919
- Magneto-acoustic oscillations and Fermi surface in Al, B. W. Roberts—1889
- Magneto-attenuation of sound in semimetals: longitudinal waves, Michael J. Harrison—1260

Adsorption (see **Gases**)

Aerodynamics (see **Fluid Dynamics**)

Afterglow (see **Electrical Discharges**)

Alloys (see **Crystalline State**)

Annihilation (see **Electrons and Positrons**)

Antiferroelectric Phenomena (see **Dielectrics and Dielectric Properties**)

Antiferromagnetism (see **Magnetic Properties**)

Antineutrinos (see **Neutrinos and Antineutrinos**)

Antineutrons (see **Elementary Particle Interactions**)

Antiprotons (see **Elementary Particle Interactions**)

Arcs (see **Electrical Discharges**)

Astrophysics
- Electromagnetic signals from nuclear explosions in outer space, Montgomery H. Johnson and Bernard A. Lippmann—827
- Possibility of fission chain reaction in supernova type I, Peter Fong—241

Atmosphere (see **Geophysics**)

Atomic and Molecular Beams
- Atomic-beam measurement of hfs and nuclear moments of I^{125}, Edgar Lipworth, Hugh L. Garvin, and Thomas M. Green—2022
- Hfs and nuclear moments of 17-hr Br^{78}, Edgar Lipworth, Thomas M. Green, Hugh L. Garvin, and William A. Nierenberg—1053
- Hfs of 6^3P_2 state of $_{80}Hg^{199}$ and $_{80}Hg^{201}$. Properties of metastable states of Hg, Mark N. McDermott and William L. Lichten—134

Atomic Mass and Abundance
- Heavy isotope abundance in Mike thermonuclear device, H. Diamond, P. R. Fields, C. S. Stevens, M. H. Studier, S. M. Fried, M. G. Inghram, D. C. Hess, G. L. Pyle, J. F. Mech, W. M. Manning, A. Ghiorso, S. G. Thompson, G. H. Higgins, G. T. Seaborg, C. I. Browne, H. L. Smith, and R. W. Spence—2000

Atomic Structure and Spectra
- Analytic wave functions. III. Spin-orbit, spin-other orbit, and spin-spin interactions, R. G. Breene, Jr.—1615
- Application of wave functions containing interelectron coordinates. II. Approximate energy levels of atoms, Peter Walsh and Sidney Borowitz—1274
- Approximate wave functions for atomic Be, R. E. Watson—170
- Atomic-beam measurement of hfs and nuclear moments of I^{125}, Edgar Lipworth, Hugh L. Garvin, and Thomas M. Green—2022

Atomic Structure and Spectra (Continued)
Charge transfer and electron production of $H^- + H$ collisions, David G. Hummer, R. F. Stebbings, Wade L. Fite, and Lewis M. Branscomb—668
Collision processes in mixtures of Hg vapor and foreign gases, Donald E. Cunningham and Leonard O. Olsen—691
Cross section for formation of doubly-ionized He by electron impact, H. E. Stanton and J. E. Monahan—711
Dispersion relations in atomic scattering problems, E. Gerjuoy and N. A. Krall—705
Fe series Hartree-Fock calculations. II, R. W. Watson—1934
Fine structure of short-lived states of H by microwave-optical method. I, W. E. Lamb, Jr., and T. M. Sanders, Jr.—1901; II, L. R. Wilcox and W. E. Lamb, Jr.—1915
Hfs of 6^3P_2 state of $_{80}Hg^{199}$ and $_{80}Hg^{201}$. Properties of metastable states of Hg, Mark N. McDermott and William L. Lichten—134
Ionization and charge transfer in p-H atom collisions, Wade L. Fite, R. F. Stebbings, David G. Hummer, and R. T. Brackmann—663
Optical pumping of He in $^3S_1$ metastable state, F. D. Colegrove and P. A. Franken—680
Paramagnetic resonance of V^{4+} in TiO_2, H. J. Gerritsen and H. R. Lewis—1010
Paramagnetic resonance spectrum of Mn in corundum, W. Low and J. T. Suss—132
Pressure broadening of violet triplet of Mn in presence of A and He, Shang-Yi Ch'en and Robert B. Bennett—1029
Pressure shifts in hfs constant of K, Arnold L. Bloom and John B. Carr—1946
Q correction in spectra of Fe group, Giulio Racah and Yehuda Shadmi—156
Variational treatment of electron-H atom elastic scattering, Sydney Geltman—1283
Auger Effect (see **Atomic Structure and Spectra; Nuclear Spectra; X Rays**)
Aurora (see **Astrophysics; Geophysics**)

Barkhausen Effect (see **Magnetic Properties**)
Biophysics
Boson Theory (see **Field Theory**)
Bremsstrahlung (see **Radiation**)
Broadening of Spectral Lines (see **Atomic Structure and Spectra; Molecular Structure and Spectra; Spectra, General**)

Capture Cross Sections (see **Electrons and Positrons; Nuclear Reactions; Radiation**)
Čerenkov Effect (see **Radiation**)
Chemical Effects and Properties
Effects of chemical binding on nuclear recoil, M. S. Nelkin and D. E. Parks—1060
Chemical Reactions (see **Chemical Effects and Properties**)
Chemiluminescence (see **Luminescence**)
Cold Emission (see **Electrical Properties**)
Colloids (see **Chemical Effects and Properties; Molecular Aggregates**)
Compton Effect (see **Radiation**)
Conductivity, Electrical (see **Electrical Conductivity and Resistance**)
Conductivity, Thermal (see **Thermal Properties**)
Constants, Standards, Units
Cosmic Radiation (see also **Mesons and Hyperons**)
Arrival direction of cosmic-ray showers from equatorial sky, E. B. Chitnis, V. A. Sarabhai, and G. Clark—1085
Yield of neutrons per interaction in U, Pb, W, and Sn by protons of six energies between 250 and 900 Mev selected from cosmic radiation, M. Bercovitch, H. Carmichael, G. C. Hanna, and E. P. Hincks—412
Cosmology (see **Astrophysics; Relativity and Gravitation**)
Coulomb Excitation (see **Nuclear Reactions; Nuclear Spectra**)
Critical Potentials (see **Atomic Structure and Spectra; Molecular Structure and Spectra**)
Cross Section (see **Electrons and Positrons; Nuclear Reactions; Radiation; Scattering**)
Crystal Counters (see **Methods and Instruments**)
Crystalline State (see also **Electrical Properties; Imperfections in Solids; Magnetic Properties; Semiconductors; etc.**)
α and β bands in NaF, NaCl, and KCl, Ryumyo Onaka and Ikuo Fujita—1597
Anisotropic conduction in nonstoichiometric rutile (TiO_2), Lewis E. Hollander, Jr., and Patricia L. Castro—1882
Antiferromagnetic superexchange effect, R. K. Nesbet—658
Behavior of principal elastic moduli and specific heat at constant volume of KCl at elevated temperatures, Frank D. Enck—1873
Breadth of F band in NaCl, A. M. Karo, C. W. McCombie, and A. M. Murray—504
Broadening of spin-phonon resonance lines by exchange and magnetic dipole interactions, Rodney Loudon—919
Cascade capture of electrons in solids, Melvin Lax—1502
Center law of lattice vibration spectra, Johannes N. Plendl—1598
Charge carrier production and mobility in anthracene crystals, R. G. Kepler—1226
Dielectric constant of dense electron gas, T. Pradhan and P. Misra—1878
Effect of shear on impurity conduction in n-type Ge, H. Fritzsche—1899
Effect of uniform compression on Ettingshausen-Nernst effect in Zn at low temperatures, K. S. Balain, C. G. Grenier, and J. M. Reynolds—935
Elastic constants of Cd from 4.2°K to 300°K, C. W. Garland and J. Silverman—1218
Elastic moduli of vanadium, G. A. Alers—1532
Electron mobility and scattering processes in AgBr at low temperatures, Dwight C. Burnham, Frederick C. Brown, and Robert S. Knox—1560
Electron scattering in high magnetic field, Arnold H. Kahn—1189
Electron wave functions in metallic K, Joseph Callaway—1012
Excitation and high-temperature absorption of KCl:Tl, David A. Patterson—962
Excitons and absorption edge of CdS, D. G. Thomas, J. J. Hopfield, and M. Power—570
Fermi surface and some simple equilibrium properties of system of interacting fermions, J. M. Luttinger—1153
Fundamental lattice dispersion frequencies of NaCl and KCl at 82°K, Marvin Hass—633
Galvanomagnetic and thermomagnetic potentials in Zn at liquid He temperatures, C. J. Bergeron, C. G. Grenier, and J. M. Reynolds—925
Gyromagnetic ratios of Fe and Ni, G. G. Scott—84
Irreversibility in interacting spin systems, J. Philippot—1803
Lattice dynamics of alkali halide crystals, A. D. B. Woods, W. Cochran, and B. N. Brockhouse—980
LCAO treatment of exciton structure in alkali halide crystals, R. A. Pappert—525
Linear antiferromagnetic chain, T. W. Ruijgrok and S. Rodriguez—596

Lorenz number for high-purity Cu, G. K. White and R. J. Tainsh—1869
Magneto-acoustic oscillations and Fermi surface in Al, B. W. Roberts—1889
Magneto-attenuation of sound in semimetals: longitudinal waves, Michael J. Harrison—1260
Measurement of equilibrium concentration of lattice vacancies in Ag near melting point, R. O. Simmons and R. W. Balluffi—600
Metallic transitions in ionic crystals: some group theoretical results, M. Flower, N. H. March, and A. M. Murray—1885
Nuclear magnetic resonance in Cu alloys. Electron distribution around solute atoms, T. J. Rowland—900
Nuclear magnetic resonance in $KMnF_3$, R. G. Shulman and K. Knox—94
Optical mode scattering contribution to electrical resistivity in zirconium hydride, Paul W. Bickel and Ted G. Berlincourt—1603
Phonon scattering in KCl-KBr solid solutions at low temperatures, Wendell S. Williams—1021
Pressure variation of elastic constants of Na, William B. Daniels—1246
Quenching of lattice vacancies in pure Ag, M. Doyama and J. S. Koehler—939
Spin-phonon interaction in paramagnetic crystals, R. D. Mattuck and M. W. P. Strandberg—1204
Surface elastic waves in cubic crystals, Denos C. Gazis, Robert Herman, and Richard F. Wallis—533
Theory of diamagnetism of graphite, J. W. McClure—606
Theory of dielectric properties of alkali halides, E. E. Havinga—1193
Theory of nuclear quadrupole interaction in Be metal, M. Pomerantz and T. P. Das—70
Theory of nuclear resonance intensity in dilute alloys, W. Kohn and S. H. Vosko—912
Theory of solid He^3, N. Bernardes and H. Primakoff—968
Vibrational modes near impurities, Herbert B. Rosenstock and Clifford C. Klick—1198

Diamagnetism (see **Magnetic Properties**)

Dielectrics and Dielectric Properties
Correction to Debye-Hückel theory, D. L. Bowers and E. E. Salpeter—1180
Crystal structure of ferroelectric $LiH_3(SeO_3)_2$, K. Vedam, Y. Okaya, and R. Pepinsky—1252
Dielectric breakdown of liquid He, C. Blank and M. H. Edwards—50
Dielectric constant of dense electron gas, T. Pradhan and P. Misra—1878
Electrical and optical investigation of absorption centers in rutile single crystals, K. G. Srivastava—516
Theory of dielectric properties of alkali halides, E. E. Havinga—1193
Transfer of electric charges through rutile single crystals, K. G. Srivastava—520

Diffraction (see also **Scattering**)
Crystal structure of ferroelectric $LiH_3(SeO_3)_2$, K. Vedam, Y. Okaya, and R. Pepinsky—1252
Effect of λ transition on atomic distribution in liquid He by neutron diffraction, D. G. Henshaw—9
Lattice dynamics of alkali halide crystals, A. D. B. Woods, W. Cochran, and B. N. Brockhouse—980
Magnetic structure of Mn_4N, W. J. Takei, G. Shirane, and B. C. Frazer—122
Pressure effect in atomic distribution in liquid He by neutron diffraction, D. G. Henshaw—14
Structure of liquid oxygen by neutron diffraction, D. G. Henshaw—22

Diffusion
Activation energy for surface migration of W in presence of high electric field, Philip S. Bettler and Francis M. Charbonnier—85
Atomic motions in water by scattering of cold neutrons, D. J. Hughes, H. Palevsky, W. Kley, and E. Tunkelo—872
Diffusion of Li in Si at high temperatures and isotope effect, E. M. Pell—1014
Diffusion rate of Li in Si at low temperatures, E. M. Pell—1222
Diffusive motions in water and cold neutron scattering, K. S. Singwi and Alf Sjölander—863
Theory of rotational Brownian motion of free rigid body, L. Dale Favro—53
Transport coefficients from dissipation in canonical ensemble, Eugene Helfand—1
Trapping and diffusion in surface region of CdS, James J. Brophy—591

Discharge of Electricity in Gases (see **Electrical Discharges**)

Disintegration and Excitation of Nucleus (see **Nuclear Reactions**)

Dynamics (see **Mechanics**)

Elasticity and Plasticity
Behavior of principal elastic moduli and specific heat at constant volume of KCl at elevated temperatures, Frank D. Enck—1873
Elastic constants of Cd from 4.2°K to 300°K, C. W. Garland and J. Silverman—1218
Elastic moduli of vanadium, G. A. Alers—1532
Possibility of existence of attractive forces between dislocations of like sign, J. Weertman—1871
Pressure variation of elastic constants of Na, William B. Daniels—1246
Surface elastic waves in cubic crystals, Denos C. Gazis, Robert Herman, and Richard F. Wallis—533

Electrical Breakdown (see **Dielectrics and Dielectric Properties; Electrical Discharges**)

Electrical Conductivity and Resistance (see also **Electrical Properties; Semiconductors; Superconductors**)
Charge carrier production and mobility in anthracene crystals, R. G. Kepler—1226
Current-carrier transport and photoconductivity in semiconductors with trapping, W. van Roosbroeck—636
Decrease of *F*-center photoconductivity upon bleaching, Fred C. Hardtke, Allen E. Scott, and Robert E. Woodley—544
Effect of O_2 on magnetoresistance of Cu, R. L. Dolecek—1501
Electron scattering in high magnetic field, Arnold H. Kahn—1189
Hall coefficient in Sn-Bi alloys, P. A. Bender and W. F. Love—506
Impurity conduction in transmutation-doped *p* Ge, H. Fritzsche and M. Cuevas—1238
Low-temperature impurity conduction and magnetoresistivity in *n*-type Ge, P. Csavinszky—1605
Microwave conductivity of plasma in magnetic field, Donald C. Kelly—27
Optical mode scattering contribution to electrical resistivity in zirconium hydride, Paul W. Bickel and Ted G. Berlincourt—1603
Photoconductivity in GaSe-GaS solid solutions, Richard H. Bube and Edward L. Lind—1535
Transfer of electric charges through rutile single crystals, K. G. Srivastava—520
Trapping and diffusion in surface region of CdS, James J. Brophy—591

Electrical Discharges
Collision processes in mixtures of Hg vapor and foreign gases, Donald E. Cunningham and Leonard O. Olsen—691
Electrical and thermal currents in slightly ionized gas, Mahendra Singh Sodha—882
Equilibrium properties of partially ionized plasma, Gilda Maki Harris, John Roberts, and John Trulio—1832
Microwave breakdown of air in nonuniform electric fields, Philip M. Platzman and Elsa Huber Solt—1143
Soluble three-dimensional model for Townsend's α, G. W. Stuart and E. Gerjuoy—892
Electrical Properties (see also **Dielectrics and Dielectric Properties; Electrical Conductivity and Resistance; Semiconductors; Superconductors**)
Auger electron ejection from Ge and Si by noble gas ions, Homer D. Hagstrum—940
Effect of uniform compression on Ettingshausen-Nernst effect in Zn at low temperatures, K. S. Balain, C. G. Grenier, and J. M. Reynolds—935
Galvanomagnetic and thermomagnetic potentials in Zn at liquid He temperatures, C. J. Bergeron, C. G. Grenier, and J. M. Reynolds—925
Interpretation of relative thermoelectric phenomena at low temperatures with special consideration of effects of cold work on Cu, W. B. Pearson—549
Spectral distribution of photomagnetoelectric effect in Ge: experiment, Frank A. Brand, Andrew N. Baker, and Herbert Mette—922
Transfer of electric charges through rutile single crystals, K. G. Srivastava—520
Weak-field magnetoresistance in p-type PbTe at room temperature and 77°K, Robert S. Allgaier—554
Electrodynamics (see **Electromagnetic Theory and Electrodynamics**)
Electroluminescence (see **Luminescence**)
Electrolysis (see **Chemical Effects and Properties**)
Electromagnetic Theory and Electrodynamics (see also **Microwaves**)
Effects of collisions on cyclotron radiation from relativistic particles, Ludwig Oster—1444
Electromagnetic signals from nuclear explosions in outer space, Montgomery H. Johnson and Bernard A. Lippmann—827
Gauge invariance and Lorentz ponderomotive force, Lloyd Motz—1102
Induced and spontaneous emission in coherent field. III, I. R. Senitzky—1807
Electron Diffraction (see **Diffraction; Scattering of Electrons and Positrons**)
Electron Optics (see **Electromagnetic Theory and Electrodynamics**)
Electronic Tubes (see **Methods and Instruments**)
Electrons and Positrons (see also **Electromagnetic Theory and Electrodynamics; Elementary Particle Interactions; Scattering of Electrons and Positrons**)
Angular correlation of annihilation radiation in S and its compounds, P. Colombino, I. Degregori, L. Mayrone, L. Trossi, and S. DeBenedetti—1665
Electron pair production in $\pi^- + d$ capture, David W. Joseph—805
Electrons, Mobility (see **Ions and Electrons, Mobility**)
Electrons, Scattering of (see **Scattering of Electrons and Positrons**)
Electrons, Secondary (see **Electrical Properties**)
Electrons, Thermionic (see **Electrical Properties**)
Electro-Optical Effects (see **Optical Properties**)
Electrostriction (see **Dielectrics and Dielectric Properties**)

Elementary Particle Interactions, General
Analytic structure of collision amplitudes in perturbation theory, Richard J. Eden—1763
Anelasticity of p-p collisions at 2.7 Bev, W. M. Bugg and D. H. King—1408
Application of dispersion relations to meson-nucleon scattering, Albert C. Finn—1786
Baryon mass spectrum, Katsumi Tanaka—1436
Boson Furry theorem, D. C. Peaslee, and M. T. Vaughn—460
Bound states and dispersion relations, R. Blankenbecler and L. F. Cook—1745
Branching ratio of electronic mode of positive pion decay, H. L. Anderson, T. Fujii, R. H. Miller, and L. Tau—2050
Charge-exchange scattering of negative pions at 61 Mev and 95 Mev, C. M. York, W. J. Kernan, and E. L. Garwin—1096
Charge-exchange scattering of negative pions at 150 Mev, W. J. Kernan—1092
Corrections to impulse approximation for photon-deuteron scattering, R. L. Schult and R. H. Capps—377
Coupled integral equations for nucleon and pion electromagnetic form factors, M. Baker and F. Zachariasen—438
Decay of μ mesons bound in K shell of light nuclei, H. Überall—365
$|\Delta I| = \frac{1}{2}$ rule and weak four-fermion interaction, S. Oneda, J. C. Pati, and B. Sakita—482
Depolarization and time reversal in p-p scattering at 142 Mev, C. F. Hwang, T. R. Ophel, E. H. Thorndike, and Richard Wilson—352
Dispersion relations for pion-hyperon production and possible pion-hyperon resonance, Richard H. Capps—1753
Electromagnetic form factors of nucleon, F. J. Ernst, R. G. Sachs, and K. C. Wali—1105
Energy dependence of nucleon-nucleon phase shifts, H. Pierre Noyes—1736
Experiment on charge independence in interactions of nucleons and pions, D. Harting, J. C. Kluyver, A. Kusumegi, R. Rigopoulos, A. M. Sachs, G. Tibell, G. Vanderhaeghe, and G. Weber—1716
Final-state interactions and $|\Delta I| = \frac{1}{2}$ selection rule, K. Chadan and S. Oneda—1126
Implications of intermediate boson basis of weak interactions: existence of quartet of intermediate bosons and their dual isotopic spin transformation properties, T. D. Lee and C. N. Yang—1410
K^--deuteron scattering and K^--nucleon scattering lengths, T. B. Day, G. A. Snow, and J. Sucher—1100
Meson-meson scattering term and low-energy pion nucleon scattering, Masao Sugawara and Akira Kanazawa—2074
Momentum and asymmetry spectrum of μ-meson decay, Richard J. Plano—1400
μ-meson decay into three electrons, M. Bander and G. Feinberg—1427
Multiple meson production by photons in H, B. M. Chasan, G. Cocconi, V. T. Cocconi, R. M. Schectman, and D. H. White—811
Partial-wave dispersion relations for pion-nucleon scattering, William R. Frazer and Jose R. Fulco—1420
Photoproduction of K^+ mesons in hydrogen, H. M. Brody, A. M. Wetherell, and R. L. Walker—1710
Photoproduction of negative and positive pions from deuterium for photon energies 500 to 1000 Mev, Gerry Neugebauer, Walter Wales, and R. L. Walker—1726
Photoproduction of π^0 mesons from H in region 900 to 1200 Mev, H. E. Jackson, J. W. DeWire, and R. M. Littauer—1381

Pion multiplicity in nucleon-antinucleon annihilation, Bipin R. Desai—1390
Pion-pion interactions in τ and τ' decays, R. F. Sawyer and K. C. Wali—1429
Pion-pion scattering and $K^+ \to 3\pi$ decay, N. N. Khuri and S. B. Treiman—1115
Production of strange particles by 1.5-Bev π^- mesons in C, Fe, and Pb, Theodore Bowen, Judson Hardy, Jr., George T. Reynolds, C. R. Sun, Guido Tagliaferri, Albert E. Werbrouck, and William H. Moore—2030
Production of strange particles by 2.8-Bev protons in C, Fe, and Pb, Theodore Bowen, Judson Hardy, Jr., George T. Reynolds, Guido Tagliaferri, Albert E. Werbrouck, and William H. Moore—2041
Proposal for determination of $\Sigma\Lambda$ relative parity from Chew and Low analysis of reactions of form $A+B \to C+D+E+\cdots$, Murray Muraskin—818
Proton-antiproton annihilation in protonium, Bipin R. Desai—1385
S-wave dominant solutions of pion-pion integral equations, Geoffrey F. Chew, Stanley Mandelstam, and H. Pierre Noyes—478
Spin-orbit force and neutral vector meson, J. J. Sakurai —1784
Strong interactions and model for hyperons, I. Goldberg and Leon F. Landovitz—2077
Tensor-force effects in odd-odd nuclei, Neal D. Newby, Jr.—747
Theory of allowed and forbidden transitions in muon capture reactions. II, Masato Morita and Daniel Greenberg—435
Theory of low-energy pion-pion interaction, Geoffrey F. Chew and Stanley Mandelstam—467
Unstable particles in general field theory, J. Gunson and J. G. Taylor—1121

Elementary Particle Interactions, Electromagnetic

Boson Furry theorem, D. C. Peaslee and M. T. Vaughn —460
Corrections to impulse approximation for photon-deuteron scattering, R. L. Schult and R. H. Capps—377
Coupled integral equations for nucleon and pion electromagnetic form factors, M. Baker and F. Zachariasen—438
Decay of μ mesons bound in K shell of light nuclei, H. Überall—365
Electromagnetic form factors of nucleon, F. J. Ernst, R. G. Sachs, and K. C. Wali—1105
Electron pair production in $\pi^- + d$ capture, David W. Joseph—805
Magnetic quenching of hyperfine depolarization of positive muons, R. A. Ferrell, Y. C. Lee, and M. K. Pal—2098 (E)
Multiple meson production by photons in H, B. M. Chasan, G. Cocconi, V. T. Cocconi, R. M. Schectman, and D. H. White—811
Photoproduction of π^0 mesons from H in region 900 to 1200 Mev, H. E. Jackson, J. W. DeWire, and R. M. Littauer—1381

Elementary Particle Interactions, Strong

Anelasticity of $\bar{p}$-p collisions at 2.7 Bev, W. M. Bugg and D. T. King—1408
Application of dispersion relations to meson-nucleon scattering, Albert C. Finn—1786
Baryon mass spectrum, Katsumi Tanaka—1436
Boson Furry theorem, D. C. Peaslee and M. T. Vaughn—460
Bound states and dispersion relations, R. Blankenbecler and L. F. Cook—1745
Charge-exchange scattering of negative pions at 61 Mev and 95 Mev, C. M. York, W. J. Kernan, and E. L. Garwin—1096
Charge-exchange scattering of negative pions at 150 Mev, W. J. Kernan—1092
Corrections to impulse approximation for photon-deuteron scattering, R. L. Schult and R. H. Capps—377
Coupled integral equations for nucleon and pion electromagnetic form factors, M. Baker and F. Zachariasen—438
Depolarization and time reversal in $\bar{p}$-p scattering at 142 Mev, C. F. Hwang, T. R. Ophel, E. H. Thorndike, and Richard Wilson—352
Dispersion relations for pion-hyperon production and possible pion-hyperon resonance, Richard H. Capps—1753
Electromagnetic form factors of nucleon, F. J. Ernst, R. G. Sachs, and K. C. Wali—1105
Electron pair production in $\pi^- + d$ capture, David W. Joseph—805
Energy dependence of nucleon-nucleon phase shifts, H. Pierre Noyes—1736
Experiment on charge independence in interactions of nucleons and pions, D. Harting, J. C. Kluyver, A. Kusumegi, R. Rigopoulos, A. M. Sachs, G. Tibell, G. Vanderhaeghe, and G. Weber—1716
Final-state interactions and $|\Delta I| = \frac{1}{2}$ selection rule, K. Chadan and S. Oneda—1126
K^--deuteron scattering and K^--nucleon scattering lengths, T. B. Day, G. A. Snow, and J. Sucher—1100
Meson-meson scattering term and low-energy pion nucleon scattering, Masao Sugawara and Akira Kanazawa—2074
Multiple meson production by photons in H, B. M. Chasan, G. Cocconi, V. T. Cocconi, R. M. Schectman, and D. H. White—811
Partial-wave dispersion relations for pion-nucleon scattering, William R. Frazer and Jose R. Fulco—1420
Photoproduction of K^+ mesons in hydrogen, H. M. Brody, A. M. Wetherell, and R. L. Walker—1710
Photoproduction of negative and positive pions from deuterium for photon energies 500 to 1000 Mev, Gerry Neugebauer, Walter Wales, and R. L. Walker—1726
Photoproduction of π^0 mesons from H in region 900 to 1200 Mev, H. E. Jackson, J. W. DeWire, and R. M. Littauer—1381
Pion multiplicity in nucleon-antinucleon annihilation, Bipin R. Desai—1390
Pion-pion interactions in τ and τ' decays, R. F. Sawyer and K. C. Wali—1429
Pion-pion scattering and $K^+ \to 3\pi$ decay, N. N. Khuri and S. B. Treiman—1115
Production of strange particles by 1.5-Bev π^- mesons in C, Fe, and Pb, Theodore Bowen, Judson Hardy, Jr., George T. Reynolds, C. R. Sun, Guido Tagliaferri, Albert E. Werbrouck, and William H. Moore—2030
Production of strange particles by 2.8-Bev protons in C, Fe, and Pb, Theodore Bowen, Judson Hardy, Jr., George T. Reynolds, Guido Tagliaferri, Albert E. Werbrouck, and William H. Moore—2041
Proposal for determinations of $\Sigma\Lambda$ relative parity from Chew and Low analysis of reactions of form $A+B \to C+D+E+\cdots$, Murray Muraskin—818
Proton-antiproton annihilation in protonium, Bipin R. Desai—1385
S-wave dominant solutions of pion-pion integral equations, Geoffrey F. Chew, Stanley Mandelstam, and H. Pierre Noyes—478
Spin-orbit force and neutral vector meson, J. J. Sakurai —1784

Elementary Particle Interactions, Strong (Continued)
Strong interactions and model for hyperons, I. Goldberg and Leon F. Landovitz—2077
Tensor-force effects in odd-odd nuclei, Neal D. Newby, Jr.—747
Theory of low-energy pion-pion interaction, Geoffrey F. Chew and Stanley Mandelstam—467
Unstable particles in general field theory, J. Gunson and J. G. Taylor—1121
Elementary Particle Interactions, Weak
Branching ratio of electronic mode of positive pion decay, H. L. Anderson, T. Fujii, R. H. Miller, and L. Tau—2050
Decay of μ mesons bound in K shell of light nuclei, H. Überall—365
$|\Delta I| = \frac{1}{2}$ rule and weak four-fermion interaction, S. Oneda, J. C. Pati, and B. Sakita—482
Final-state interactions and $|\Delta I| = \frac{1}{2}$ selection rule, K. Chadan and S. Oneda—1126
Implications of intermediate boson basis of weak interactions: existence of quartet of intermediate bosons and their dual isotopic spin transformation properties, T. D. Lee and C. N. Yang—1410
Momentum and asymmetry spectrum of μ-meson decay, Richard J. Plano—1400
μ-meson decay into three electrons, M. Bander and G. Feinberg—1427
Pion-pion interactions in τ and τ' decays, R. F. Sawyer and K. C. Wali—1429
Pion-pion scattering and $K^+ \rightarrow 3\pi$ decay, N. N. Khuri and S. B. Treiman—1115
Theory of allowed and forbidden transitions in muon capture reactions. II, Masato Morita and Daniel Greenberg—435
Unstable particles in general field theory, J. Gunson and J. G. Taylor—1121
Elements (see **Atomic Mass and Abundance**)
Energy Loss of Particles (see **Range and Energy Loss**)
Energy States of Atoms (see **Atomic Structure and Spectra**)
Energy States of Molecules (see **Molecular Structure and Spectra**)
Energy States of Nucleus (see **Nuclear Reactions; Nuclear Spectra; Nuclear Structure Theory**)
Equations of State (see **Chemical Effects and Properties**)
Errata
Analysis of linear cooperative problem as Markoff process, W. W. Mullins—2098(E)
Lifetime matrix in collision theory, Felix T. Smith—2098(E)
Magnetic quenching of hyperfine depolarization of positive muons, R. A. Ferrell, Y. C. Lee, and M. K. Pal—2098(E)
Monte Carlo calculations of nuclear evaporation processes. III. Applications to low-energy reactions, I. Dostrovsky, Z. Fraenkel, and G. Friedlander—2098(E)
Errors of Measurement (see **Methods and Instruments**)
Evaporation (see **Liquids**)
Excitation of Atoms (see **Atomic Structure and Spectra**)
Excitation of Molecules (see **Molecular Structure and Spectra**)
Excitation of Nucleus (see **Nuclear Reactions; Nuclear Spectra; Nuclear Structure Theory**)
Explosion Phenomena (see **Fluid Dynamics**)

Faraday Effect (see **Optical Properties**)
Ferroelectric Phenomena (see **Dielectrics and Dielectric Properties**)
Ferromagnetism (see **Magnetic Properties**)
Field Emission (see **Electrical Properties**)
Field Theory (see also **Quantum Electrodynamics**)
Analytic structure of collision amplitudes in perturbation theory, Richard J. Eden—1763
Application of dispersion relations to meson-nucleon scattering, Albert C. Finn—1786
Asymptotic conditions and perturbation theory, K. Nishijima—485
Baryon mass spectrum, Katsumi Tanaka—1436
Boson Furry theorem, D. C. Peaslee and M. T. Vaughn—460
Bound states and dispersion relations, R. Blankenbecler and L. F. Cook—1745
Charged-scalar strong-coupling theory, H. Nickle and R. Serber—449
Corrections to impulse approximation for photon-deuteron scattering, R. L. Schult and R. H. Capps—377
Coupled integral equations for nucleon and pion electromagnetic form factors, M. Baker and F. Zachariasen—438
$|\Delta I| = \frac{1}{2}$ rule and weak four-fermion interaction, S. Oneda, J. C. Pati, and B. Sakita—482
Dispersion relations for pion-hyperon production and possible pion-hyperon resonance, Richard H. Capps—1753
Electromagnetic form factors of nucleon, F. J. Ernst, R. G. Sachs, and K. C. Wali—1105
High-energy limit of form factors, S. D. Drell and F. Zachariasen—463
Implications of intermediate boson basis of weak interactions: existence of quartet of intermediate bosons and their dual isotopic spin transformation properties, T. D. Lee and C. N. Yang—1410
Meson-meson scattering term and low-energy pion nucleon scattering, Masao Sugawara and Akira Kanazawa—2074
Partial-wave dispersion relations for pion-nucleon scattering, William R. Frazer and Jose R. Fulco—1420
Pion-pion interactions in τ and τ' decays, R. F. Sawyer and K. C. Wali—1429
Pion-pion scattering, and $K^+ \rightarrow 3\pi$ decay, N. N. Khuri and S. B. Treiman—1115
S-wave dominant solutions of pion-pion integral equations, Geoffrey F. Chew, Stanley Mandelstam, and H. Pierre Noyes—478
Some integral representations for vertex function, A. Minguzzi and R. F. Streater—1127
Spin-orbit force and neutral vector meson, J. J. Sakurai—1784
Strong interactions and model for hyperons, I. Goldberg and Leon F. Landovitz—2077
Theory of allowed and forbidden transitions in muon capture reactions. II, Masato Morita and Daniel Greenberg—435
Theory of low-energy pion-pion interaction, Geoffrey F. Chew and Stanley Mandelstam—467
Unstable particles in general field theory, J. Gunson and J. G. Taylor—1121
Films, Properties
Fine Structure (see **Atomic Structure and Spectra**)
Fission of Nucleus (see **Nuclear Fission**)
Fluctuation Phenomena (see **Noise**)
Fluid Dynamics
Fluorescence (see **Luminescence**)

Galvanomagnetic Effect (see **Magnetic Properties**)
Gamma Rays (see also **Nuclear Reactions; Nuclear Spectra; Radiation; Range and Energy Loss**)
Measurement of circular polarization of resonance-scattered gamma rays following electron capture of Se^{75}, F. Boehm and C. J. Gallagher, Jr.—258
Gases

Geophysics
Electromagnetic signals from nuclear explosions in outer space, Montgomery H. Johnson and Bernard A. Lippmann—827

Helium, Liquid
Damping of torsionally oscillating cylinder in liquid He at various temperatures and densities, Benjamin Welber—1816
Dielectric breakdown of liquid He, C. Blank and M. H. Edwards—50
Effect of λ transition on atomic distribution in liquid He by neutron diffraction, D. G. Henshaw—9
Equation of state of Bose-Einstein system of particles with attractive interactions, Kerson Huang—1129
Possible phase transition in liquid He^3, V. J. Emery and A. M. Sessler—43
Pressure effect in atomic distribution in liquid He by neutron diffraction, D. G. Henshaw—14
Statistical mechanics of liquid He^4, Ryoichi Kikuchi, Harry H. Denman, and Charles L. Schreiber—1823
Study of superfluidity in liquid He by ion motion, F. Reif and Lothar Meyer—1164
Theory of solid He^3, N. Bernardes and H. Primakoff—968
Hydrodynamics (see **Fluid Dynamics**)
Hyperfine Structure (see **Atomic Structure and Spectra; Molecular Structure and Spectra; Nuclear Moments and Spin**)
Hyperons (see **Mesons and Hyperons**)

Imperfections in Solids (see also **Crystalline State; Electrical Conductivity and Resistance; Luminescence; Semiconductors**)
α and β bands in NaF, NaCl, and KCl, Ryumyo Onaka and Ikuo Fujita—1597
Breadth of *F* band in NaCl, A. M. Karo, C. W. McCombie, and A. M. Murray—504
Decrease of *F*-center photoconductivity upon bleaching, Fred C. Hardtke, Allen E. Scott, and Robert E. Woodley—544
Dependence of optical bleaching rate of x-irradiated KCl crystals on light intensity, W. E. Bron and W. R. Heller—1864
Effect of O_2 on magnetoresistance of Cu, R. L. Dolecek—1501
Electrical and optical investigation of absorption centers in rutile single crystals, K. G. Srivastava—516
Etch pits on dendritic Ge: a clarification, P. J. Holmes—131
Excitons and absorption edge of CdS, D. G. Thomas, J. J. Hopfield, and M. Power—570
Interpretation of relative thermoelectric phenomena at low temperatures with special consideration of effects of cold work on Cu, W. B. Pearson—549
LCAO treatment of exciton structure in alkali halide crystals, R. A. Pappert—525
Magnetic after-effect in Fe due to motion of dislocations, Giuseppe Biorci, Andrea Ferro, and Giorgio Montalenti—653
Magnetic resonance and rapid passage in irradiated LiF, James S. Hyde—1483
Measurement of equilibrium concentration of lattice vacancies in Ag near melting point, R. O. Simmons and R. W. Balluffi—600
Measurement of *F*-center concentration and relaxation time by microwave Faraday rotation, Dale Teaney, W. E. Blumberg, and A. M. Portis—1851
Possibility of existence of attractive forces between dislocations of like sign, J. Weertman—1871
Quenching of lattice vacancies in pure Ag, M. Doyama and J. S. Koehler—939
Radiation effects of bombardment of quartz and vitreous silica by 7.5-kev to 59-kev positive ions, R. L. Hines and R. Arndt—623
Reduction in coercive force caused by certain type of imperfection, A. Aharoni—127
Relation between x-ray coloration and optical bleaching of KCl crystals, W. E. Bron—1853
Solubility of flaws in heavily-doped semiconductors, W. Shockley and J. L. Moll—1480
Spin relaxation of *F*-center electrons, W. E. Blumberg—1842
Symmetry of green phosphorescence of heat pretreated colored KCl crystals, A. Halperin and N. Lewis—510
Temperature dependence of optical bleaching of KCl crystals near 0°C, W. E. Bron and A. S. Nowick—114
Thermal resistance due to point defects at high temperatures, P. G. Klemens—507
Vibrational modes near impurities, Herbert B. Rosenstock and Clifford C. Klick—1198
Inelastic Scattering (see **Nuclear Reactions; Scattering**)
Instruments (see **Methods and Instruments**)
Internal Conversion (see **Nuclear Spectra**)
Ionization (see also **Electrical Discharges; Range and Energy Loss**)
Cross section for formation of doubly-ionized He by electron impact, H. E. Stanton and J. E. Monahan—711
Ionization and charge transfer in *p*-H atom collisions, Wade L. Fite, R. F. Stebbings, David G. Hummer, and R. T. Brackmann—663
Ionization Potentials of Atoms (see **Atomic Structure and Spectra**)
Ionization Potentials of Molecules (see **Molecular Structure and Spectra**)
Ionosphere (see **Geophysics**)
Ions (see also **Electrical Discharges**)
Ions and Electrons, Mobility (see also **Semiconductors**)
Charge carrier production and mobility in anthracene crystals, R. G. Kepler—1226
Electron mobility and scattering processes in AgBr at low temperatures, Dwight C. Burnham, Frederick C. Brown, and Robert S. Knox—1560
Study of superfluidity in liquid He by ion motion, F. Reif and Lothar Meyer—1164
Isobars (see **Atomic Mass and Abundance**)
Isomers, Molecular (see **Molecular Structure and Spectra**)
Isomers, Nuclear (see **Nuclear Spectra**)

Kerr Effect (see **Optical Properties**)
Kinetic Theory of Gases (see **Gases**)

Liquid Helium (see **Helium, Liquid**)

Liquids
Atomic motions in water by scattering of cold neutrons, D. J. Hughes, H. Palevsky, W. Kley, and E. Tunkelo —872
Damping of torsionally oscillating cylinder in liquid He at various temperatures and densities, Benjamin Welber —1816
Diffusive motions in water and cold neutron scattering, K. S. Singwi and Alf Sjölander—863
Neutron scattering by fluids and the law of corresponding states, George H. Vineyard—1150
Scattering of slow neutrons by water, Mark Nelkin—741
Structure of liquid oxygen by neutron diffraction, D. G. Henshaw—22
Luminescence
Change in structure of blue and green fluorescence in CdS at low temperatures, L. S. Pedrotti and D. C. Reynolds—1897
Effects of added gases on sensitized fluorescence spectrum of Hg-Tl mixture, Richard A. Anderson and Robert H. McFarland—693
Excitation and high-temperature absorption of KCl:Tl, David A. Patterson—962
Symmetry of green phosphorescence of heat pretreated colored KCl crystals, A. Halperin and N. Lewis—510

Magnetic Fields (see **Electromagnetic Theory and Electrodynamics**)
Magnetic Properties
Adiabatic demagnetization and specific heat in ferrimagnets, J. E. Kunzler, L. R. Walker, and J. K. Galt—1609
Anisotropic ferromagnetic resonance linewidth in ferrites, Herbert B. Callen and Ernest Pittelli—1523
Anisotropy of intrinsic domain magnetization of ferromagnet, S. H. Charap—1538
Antiferromagnetic superexchange effect, R. K. Nesbet—658
Broadening of spin-phonon resonance lines by exchange and magnetic dipole interactions, Rodney Loudon—919
Classical theory of spin configurations in cubic spinel, T. A. Kaplan—1460
Gyromagnetic ratios of Fe and Ni, G. G. Scott—84
Linear antiferromagnetic chain, T. W. Ruijgrok and S. Rodriguez—596
Magnetic after-effect in Fe due to motion of dislocations, Giuseppe Biorci, Andrea Ferro, and Giorgio Montalenti—653
Magnetic properties of Mn_2O_3 and canted spin problem, Kirby Dwight and Norman Menyuk—1470
Magnetic structure of Mn_4N, W. J. Takei, G. Shirane, and B. C. Frazer—122
Nuclear magnetic resonance in $KMnF_3$, R. G. Shulman and K. Knox—94
Optical pumping of He in $^3S_1$ metastable state, F. D. Colegrove and P. A. Franken—680
Properties of some magnetic superconductors, R. M. Bozorth, D. D. Davis, and A. J. Williams—1570
Reduction in coercive force caused by certain type of imperfection, A. Aharoni—127
Theory of adiabatic susceptibility, Tsunenobu Yamamoto—701
Theory of diamagnetism of graphite, J. W. McClure—606
Theory of nuclear resonance intensity in dilute alloys, W. Kohn and S. H. Vosko—912
Trigonal magnetocrystalline anisotropy in hexagonal oxides, L. R. Bickford, Jr.—1000
Magnetic Resonance (see also **Nuclear Moments and Spin**)
Anisotropic ferromagnetic resonance linewidth in ferrites, Herbert B. Callen and Ernest Pittelli—1523
Approach to equilibrium in quantal systems: magnetic resonance, A. Sher and H. Primakoff—178
Broadening of spin-phonon resonance lines by exchange and magnetic dipole interactions, Rodney Loudon—919
Cross relaxation effect of Cr and Fe in $K_3(Co, Cr, Fe)(CN)_6$, Jan M. Minkowski—1577
Cross relaxation in ruby, W. B. Mims and J. D. McGee —1233
Electron spin-lattice relaxation in dilute $K_3Co(CN)_6$ at He temperatures, J. G. Castle, Jr., P. F. Chester, and P. E. Wagner—953
Entropy and cross-relaxation in spin systems, A. E. Siegman—562
Estimate of nuclear moment of Ni^{61} from electron spin resonance, J. W. Orton, P. Auzins, and J. E. Wertz—1691
Ferrimagnetic resonance in three-sublattice systems, Roald K. Wangsness—1496
Hfs of 6^3P_2 state of $_{80}Hg^{199}$ and $_{80}Hg^{201}$. Properties of metastable states of Hg, Mark N. McDermott and William L. Lichten—134
Irreversibility in interacting spin systems, J. Philipott—1803
Magnetic resonance and rapid passage in irradiated LiF, James S. Hyde—1483
Modulation-effect corrections for moments of magnetic resonance line shapes, K. Halbach—1230
Nuclear magnetic resonance in Cu alloys. Electron distribution around solute atoms, T. J. Rowland—900
Nuclear magnetic resonance in $KMnF_3$, R. G. Shulman and K. Knox—94
Nuclear spin-lattice relaxation caused by paramagnetic impurities, W. E. Blumberg—79
Paramagnetic resonance and optical spectrum of Fe in beryl, M. Dvir and W. Low—1587
Paramagnetic resonance of CdTe:Mn and CdS:Mn, John Lambe and Chihiro Kikuchi—1256
Paramagnetic resonance of V^{4+} in TiO_2, H. J. Gerritsen and H. R. Lewis—1010
Paramagnetic resonance spectrum of Mn in corundum, W. Low and J. T. Suss—132
Phonon broadening of impurity lines, E. O. Kane—40
Saturation of magnetic resonance absorption in dilute inhomogeneously broadened systems, James S. Hyde—1492
Spin-phonon interaction in paramagnetic crystals, R. D. Mattuck and M. W. P. Strandberg—1204
Spin relaxation of *F*-center electrons, W. E. Blumberg—1842
Theory of nuclear quadrupole interaction in Be metal, M. Pomerantz and T. P. Das—70
Magnetohydrodynamics (see **Fluid Dynamics**)
Magneto-Optical Effects (see **Optical Properties**)
Magnetoresistance (see **Electrical Conductivity and Resistance; Semiconductors**)
Magnetostriction (see **Magnetic Properties**)
Mass Defects (see **Atomic Mass and Abundance**)
Mass Spectroscopy (see **Atomic Mass and Abundance; Methods and Instruments**)
Mathematical Methods
Commutation relations of quantum mechanics, Joseph V. Lepore—821
Some integral representations for vertex function, A. Minguzzi and R. F. Streater—1127
Measurements (see **Methods and Instruments**)
Mechanics

Meson Field Theory (see **Field Theory**)
Mesons and Hyperons (see also **Cosmic Radiation; Elementary Particle Interactions; Nuclear Reactions Induced by Mesons and Hyperons; Scattering of Mesons and Hyperons**)
Anelasticity of p-p collisions at 2.7 Bev, W. M. Bugg and D. T. King—1408
Baryon mass spectrum, Katsumi Tanaka—1436
Branching ratio of electronic mode of positive pion decay, H. L. Anderson, T. Fujii, R. H. Miller, and L. Tau—2050
Charge-exchange scattering of negative pions at 61 Mev and 95 Mev, C. M. York, W. J. Kernan, and E. L. Garwin—1096
Charge-exchange scattering of negative pions at 150 Mev, W. J. Kernan—1092
Decay of μ mesons bound in K shell of light nuclei, H. Überall—365
$|\Delta I| = \frac{1}{2}$ rule and weak four-fermion interaction, S. Oneda, J. C. Pati, and B. Sakita—482
Depolarization of muon by hyperfine interaction, Elihu Lubkin—815
Experiment on charge independence in interactions of nucleons and pions, D. Harting, J. C. Kluyver, A. Kusumegi, R. Rigopoulos, A. M. Sachs, G. Tibell, G. Vanderhaeghe, and G. Weber—1716
Final-state interactions and $|\Delta I| = \frac{1}{2}$ selection rule, K. Chadan and S. Oneda—1126
Interactions of 125-Mev K^+ mesons in nuclear emulsion, O. R. Price, D. H. Stork, and H. K. Ticho—1702
K^--deuteron scattering and K^--nucleon scattering lengths, T. B. Day, G. A. Snow, and J. Sucher—1100
Magnetic quenching of hyperfine depolarization of positive muons, R. A. Ferrell, Y. C. Lee, and M. K. Pal—2098(E)
Momentum and asymmetry spectrum of μ-meson decay, Richard J. Plano—1400
μ-meson decay into three electrons, M. Bander and G. Feinberg—1427
μ-mesonic molecules. I. Three-body problem, Stanley Cohen, David L. Judd, and Robert J. Riddell, Jr.—384; II. Molecular-ion formation and nuclear catalysis, Stanley Cohen, David L. Judd, and Robert J. Riddell, Jr.—397
Multiple meson production by photons in H, B. M. Chasan, G. Cocconi, V. T. Cocconi, R. M. Schectman, and D. H. White—811
Photoproduction of K^+ mesons in hydrogen, H. M. Brody, A. M. Wetherell, and R. L. Walker—1710
Photoproduction of negative and positive pions from deuterium for photon energies 500 to 1000 Mev, Gerry Neugebauer, Walter Wales, and R. L. Walker—1726
Photoproduction of π^0 mesons from H in region 900 to 1200 Mev, H. E. Jackson, J. W. DeWire, and R. M. Littauer—1381
Pion multiplicity in nucleon-antinucleon annihilation, Bipin R. Desai—1390
Pion-pion interactions in τ and τ' decays, R. F. Sawyer and K. C. Wali—1429
Pion-pion scattering and $K^+ \rightarrow 3\pi$ decay, N. N. Khuri and S. B. Treiman—1115
Production of strange particles by 1.5-Bev π^- mesons in C, Fe, and Pb, Theodore Bowen, Judson Hardy, Jr., George T. Reynolds, C. R. Sun, Guido Tagliaferri, Albert E. Werbrouck, and William H. Moore—2030
Production of strange particles by 2.8-Bev protons in C, Fe, and Pb, Theodore Bowen, Judson Hardy, Jr., George T. Reynolds, Guido Tagliaferri, Albert E. Werbrouck, and William H. Moore—2041
Proposal for determination of $\Sigma\Lambda$ relative parity from Chew and Low analysis of reactions of form $A + B \rightarrow C + D + E + \cdots$, Murray Muraskin—818
S-wave dominant solutions of pion-pion integral equations, Geoffrey F. Chew, Stanley Mandelstam, and H. Pierre Noyes—478
Strong interactions and model for hyperons, I. Goldberg and Leon F. Landovitz—2077
Theory of allowed and forbidden transitions in muon capture reactions. II, Masato Morita and Daniel Greenberg—435
Theory of low-energy pion-pion interaction, Geoffrey F. Chew and Stanley Mandelstam—467
Metals (see **Crystalline State**)
Metastable Atoms (see **Atomic Structure and Spectra**)
Metastable Molecules (see **Molecular Structure and Spectra**)
Meteorology (see **Geophysics**)
Methods and Instruments
Velocity dependence of bubble density for charged particle tracks in liquid hydrogen, V. P. Kenney—432
Microwaves (see also **Atomic Structure and Spectra; Magnetic Resonance; Molecular Structure and Spectra; Nuclear Moments and Spin**)
Measurement of F-center concentration and relaxation time by microwave Faraday rotation, Dale Teaney, W. E. Blumberg, and A. M. Portis—1851
Microwave breakdown of air in nonuniform electric fields, Philip M. Platzman and Elsa Huber Solt—1143
Observation of π Stark components in microwave spectroscopy: precision measurements on HCN, Brojo N. Bhattacharya and Walter Gordy—144
Miscellaneous
Mobility of Ions and Electrons (see **Ions and Electrons, Mobility**)
Molecular Aggregates
Molecular Beams (see **Atomic and Molecular Beams**)
Molecular Structure and Spectra
Hfs of microwave spectra of NO molecule and nuclear quadrupole moment of nitrogen, Chun C. Lin—1027
μ-mesonic molecules. I. Three-body problem, Stanley Cohen, David L. Judd, and Robert J. Riddell, Jr.—384; II. Molecular-ion formation and nuclear catalysis, Stanley Cohen, David L. Judd, and Robert J. Riddell, Jr.—397
Observation of π Stark components in microwave spectroscopy: precision measurements on HCN, Brojo N. Bhattacharya and Walter Gordy—144
Vibrational states of H_3 molecular ion, Stanley Cohen, John R. Hiskes, and Robert J. Riddell, Jr.—1025
Moments, Nuclear (see **Nuclear Moments and Spin**)
Moments of Molecules (see **Molecular Structure and Spectra**)
Muonium (see **Atomic Structure and Spectra; Mesons and Hyperons**)

Neutrinos and Antineutrinos (see also **Nuclear Spectra; Radioactivity**)
Neutron Diffraction (see **Diffraction; Scattering of Neutrons**)
Neutrons (see **Elementary Particle Interactions**)

Noise
Surface-dependent $1/f$ noise in Ge, A. U. MacRae and H. Levinstein—62
Nuclear Fission
Competition between fission and neutron emission in excited heavy nuclei, Manfred Lindner and Anthony Turkevich—1632
Ratio of asymmetric to symmetric fission of Pu^{239} and Pu^{241} as function of neutron energy, R. B. Regier, W. H. Burgus, R. L. Tromp, and B. H. Sorensen—2017
Spontaneous fission yields of Cf^{254}, W. E. Nervik—1685
Nuclear Forces (see **Elementary Particle Interactions; Field Theory; Nuclear Structure Theory**)
Nuclear Induction (see **Magnetic Resonance; Nuclear Moments and Spin**)
Nuclear Isomers (see **Nuclear Spectra; Radioactivity**)
Nuclear Moments and Spin (see also **Nuclear Spectra**)
Atomic-beam measurement of hfs and nuclear moments of I^{123}, Edgar Lipworth, Hugh L. Garvin, and Thomas M. Green—2022
Estimate of nuclear moment of Ni^{61} from electron spin resonance, J. W. Orton, P. Auzins, and J. E. Wertz—1691
Hfs and nuclear moments of 17-hr Br^{76}, Edgar Lipworth, Thomas M. Green, Hugh L. Garvin, and William A. Nierenberg—1053
Hfs of microwave spectra of NO molecule and nuclear quadrupole moment of nitrogen, Chun C. Lin—1027
Theory of nuclear quadrupole interaction in Be metal, M. Pomerantz and T. P. Das—70
Nuclear Photoeffects
Corrections to impulse approximation for photon-deuteron scattering, R. L. Schult and R. H. Capps—377
Cross section for reaction $C^{12}(\gamma,n)$ at 6.4 Mev, R. D. Edge—1643
Dependence on atomic number of nuclear photoeffect at high energies, P. C. Stein, A. C. Odian, A. Wattenberg, and R. Weinstein—348
Deuteron photodisintegration in medium energy range, Gustav Kramer and Carl Werntz—1627
Multiple meson production by photons in H, B. M. Chasan, G. Cocconi, V. T. Cocconi, R. M. Schectman, and D. H. White—811
Photoneutron reactions, C^{12}, N^{14}, O^{16}, and F^{19} near thresholds, K. N. Geller, J. Halpern, and E. G. Muirhead—716
Photoproduction of K^+ mesons in hydrogen, H. M. Brody, A. M. Wetherell, and R. L. Walker—1710
Photoproduction of negative and positive pions from deuterium for photon energies 500 to 1000 Mev, Gerry Neugebauer, Walter Wales, and R. L. Walker—1726
Photoproduction of π^0 mesons from H in region 900 to 1200 Mev, H. E. Jackson, J. W. DeWire, and R. M. Littauer—1381
Photoproton and photoneutron production in Al and Cu, R. E. Chrien and A. H. Benade—748
Nuclear Reactions, General (see also **Elementary Particle Interactions; Scattering**)
Classical analysis of reaction $Be^9(Li^7,Li^8)Be^8$, Samuel K. Allison—1975
Effects of chemical binding on nuclear recoil, M. S. Nelkin and D. E. Parks—1060
Monte Carlo calculations of nuclear evaporation processes. III. Applications to low-energy reactions, I. Dostrovsky, Z. Fraenkel, and G. Friedlander—2098(E)
μ-mesonic molecules. I. Three-body problem, Stanley Cohen, David L. Judd, and Robert J. Riddell, Jr.—384; II. Molecular-ion formation and nuclear catalysis, Stanley Cohen, David L. Judd, and Robert J. Riddell, Jr.—397
Neutron transfer and tunneling mechanism in bombardment of Au by nitrogen, J. A. McIntyre, T. L. Watts, and F. C. Jobes—1331
Nonlocal optical model for nucleon-nuclear interactions, P. J. Wyatt, J. G. Wills, and A. E. S. Green—1031
Nuclear structure and simple nuclear reactions, Paul A. Benioff—324
Recoil studies of heavy element nuclear reactions. I, Paul F. Donovan, B. G. Harvey, and W. H. Wade—218; II, B. G. Harvey, W. H. Wade, and Paul F. Donovan—225
Threshold effects in three-body channels, Luciano Fonda and Roger G. Newton—1394
Nuclear Reactions Induced by α Particles and He^3 (see also **Scattering of α Particles and He^3**)
Angular distributions for $C^{13}(\alpha,p)N^{16}$ at 16.1–19.0 Mev and $F^{19}(\alpha,p)Ne^{22}$ at 18.9 Mev, J. R. Priest, D. J. Tendam, and E. Bleuler—1301
Interaction of high-energy protons and α particles with I^{127}, Inge-Marie Ladenbauer and Lester Winsberg—1368
Neutrons from He^3 bombardment of O^{16} and Mg^{25}, F. Ajzenberg-Selove and K. L. Dunning—1681
Recoil studies of heavy element nuclear reactions. I, Paul F. Donovan, B. G. Harvey, and W. H. Wade—218; II, B. G. Harvey, W. H. Wade, and Paul F. Donovan—225
Stripping effects in reactions $C^{13}(He^3,p)N^{15}$ and $C^{13}(He^3,d)N^{14}$ at 13.9 Mev, J. R. Priest, D. J. Tendam, and E. Bleuler—1295
Study of (He^3,d) and (He^3,t) reactions in light nuclei at 25 Mev, H. E. Wegner and W. S. Hall—1654
Two-nucleon stripping process, M. el Nadi—242
Nuclear Reactions Induced by Deuterons and Tritons (see also **Scattering of Deuterons and Tritons**)
Angular distributions of $B^{10}(d,\alpha)Be^8$ reactions from 0.6 to 1.5 Mev, Robert L. Becker—1076
Angular distributions of $D(d,n)He^3$ reaction for 5- to 12-Mev deuterons, Murrey D. Goldberg and James D. Le Blanc—1992
(d,p) and (d,t) reactions on isotopes, E. W. Hamburger and A. G. Blair—777
Excitation curves and angular distributions for $N^{14}(d,n)O^{15}$, Theo Retz-Schmidt and Jesse L. Weil—1079
Excited states of P^{30}, D. Piraino, C. H. Paris, and W. W. Buechner—732
Interaction of 6- to 14-Mev deuterons with He^3 and tritium, L. Stewart, J. E. Brolley, Jr., and L. Rosen—1649
Recoil studies of heavy element nuclear reactions. I, Paul F. Donovan, B. G. Harvey, and W. H. Wade—218; II, B. G. Harvey, W. H. Wade, and Paul F. Donovan—225
Results of stripping analysis of $Co^{59}(d,p)Co^{60}$ reaction, H. A. Enge, D. L. Jarrell, and C. C. Angleman—735
Stripping mechanism for reactions with small Q values. Reaction $Li^7(d,p)Li^8$, J. P. F. Sellschop—251
Two-nucleon stripping process, M. el Nadi—242
Velocity spectrum of protons and tritons from the d-d reaction in Scylla, D. E. Nagle, W. E. Quinn, F. L. Ribe, and W. B. Riesenfeld—857
Nuclear Reactions Induced by Mesons and Hyperons (see also **Elementary Particle Interactions; Mesons and Hyperons; Scattering of Mesons and Hyperons**)
Decay of μ mesons bound in K shell of light nuclei, H. Überall—365
Electron pair production in $\pi^- + d$ capture, David W. Joseph—805
Interactions of 125-Mev K^+ mesons in nuclear emulsion, O. R. Price, D. H. Stork, and H. K. Ticho—1702
Production of strange particles by 1.5-Bev π^- mesons in C, Fe, and Pb, Theodore Bowen, Judson Hardy, Jr., George T. Reynolds, C. R. Sun, Guido Tagliaferri, Albert E. Werbrouck, and William H. Moore—2030

Theory of allowed and forbidden transitions in muon capture reactions. II, Masato Morita and Daniel Greenberg —435

Nuclear Reactions Induced by Neutrons (see also **Elementary Particle Interactions; Scattering of Neutrons**)

Dependence of In^{115} activation ratio on neutron energy, Fahri Domanic and Vance L. Sailor—208

Effects of chemical binding on nuclear recoil, M. S. Nelkin and D. E. Parks—1060

Excitation function for $Zn^{64}(n,2n)Zn^{63}$, D. R. Koehler and W. L. Alford—311

Heavy isotope abundance in Mike thermonuclear device, H. Diamond, P. R. Fields, C. S. Stevens, M. H. Studier, S. M. Fried, M. G. Inghram, D. C. Hess, G. L. Pyle, J. F. Mech, W. M. Manning, A. Ghiorso, S. G. Thompson, G. H. Higgins, G. T. Seaborg, C. I. Browne, H. L. Smith, and R. W. Spence—2000

Precision determination of slow neutron absorption cross section of B^{10}, G. J. Safford, T. I. Taylor, B. M. Rustad, and W. W. Havens, Jr.—1291

Protons from 14-Mev neutron interaction with Zr, Se Hee Ahn, J. R. Hearst, J. H. Roberts, and E. N. Strait—1667

Ratio of asymmetric to symmetric fission of Pu^{239} and Pu^{241} as function of neutron energy, R. B. Regier, W. H. Burgus, R. L. Tromp, and B. H. Sorensen—2017

Nuclear Reactions Induced by Protons and Antiprotons (see also **Elementary Particle Interactions; Scattering of Protons and Antiprotons**)

Anelasticity of p-p collisions at 2.7 Bev, W. M. Bugg and D. T. King—1408

Antiproton-proton cross sections at 1.0, 1.25, and 2.0 Bev, Rafael Armenteros, Charles A. Coombes, Bruce Cork, Glen R. Lambertson, and W. A. Wenzel—2068

Competition between fission and neutron emission in excited heavy nuclei, Manfred Lindner and Anthony Turkevich—1632

Experiment on charge independence in interactions of nucleons and pions, D. Harting, J. C. Kluyver, A. Kusumegi, R. Rigopoulos, A. M. Sachs, G. Tibell, G. Vanderhaeghe, and G. Weber—1716

Interaction of high-energy protons and α particles with I^{127}, Inge-Marie Ladenbauer and Lester Winsberg—1368

Interaction of high-energy protons with In, David R. Nethaway and Lester Winsberg—1375

Nuclear reactions of low-Z elements with 5.7-Bev protons, Paul A. Benioff—316

Nuclear structure and simple nuclear reactions, Paul A. Benioff—324

Production of strange particles by 2.8-Bev protons in C, Fe, and Pb, Theodore Bowen, Judson Hardy, Jr., George T. Reynolds, Guido Tagliaferri, Albert E. Werbrouck, and William H. Moore—2041

Proton-antiproton annihilation in protonium, Bipin R. Desai—1385

Reaction $C^{14}(p,n)N^{14}$, J. K. Bair, R. D. Edge, and H. B. Willard—1948

Yield of neutrons per interaction in U, Pb, W, and Sn by protons of six energies between 250 and 900 Mev selected from cosmic radiation, M. Bercovitch, H. Carmichael, G. C. Hanna, and E. P. Hincks—412

Nuclear Scattering (see **Scattering**)

Nuclear Spectra (see also **Nuclear Reactions; Radioactivity**)

Accurate method for measuring internal conversion coefficients, D. C. Lu—286

β-decay theory and spectrum of Rb^{87}, M. A. Preston, G. H. Keech, and J. M. Pearson—305

Branching of transitions in some mirror nuclei, W. L. Talbert, Jr., and M. G. Stewart—272

Decay of Dy^{160}, R. G. Helmer and S. B. Burson—788

Decay of Ga^{65} and Cu^{65}, Arthur Schwarzschild and Lee Grodzins—276

Decay of 6.3-min Br^{79}, William R. Pierson and Charles D. Coryell—755

Decays of Rh^{100} and Ag^{100}, R. L. Robinson, F. K. McGowan, and W. G. Smith—1692

(d,p) and (d,t) reactions on Mg isotopes, E. W. Hamburger and A. G. Blair—777

Effects of chemical binding on nuclear recoil, M. S. Nelkin and D. E. Parks—1060

Energy levels of Si isotopes from inelastic proton scattering, R. E. White—767

Evidence for small deviations in allowed positron spectrum of Zr^{89}, J. H. Hamilton, L. M. Langer, and W. G. Smith—772

Evidence for 0^+ and 1^- levels in U^{234} populated in one-minute β decay of Pa^{234m}, G. T. Wood—2004

Excitation curves and angular distributions for $N^{14}(d,n)O^{15}$, Theo Retz-Schmidt and Jesse L. Weil—1079

Excited states of P^{30}, D. Piraino, C. H. Paris, and W. W. Buechner—732

Gamma radiations of Na^{23} and Ne^{20}, T. H. Kruse, R. D. Bent, and L. J. Lidofsky—289

Internal conversion electrons following Coulomb excitation of highly deformed odd-A nuclei, E. M. Bernstein and R. Graetzer—1321

Level structure of N^{14}, J. K. Bair, H. O. Cohn, and H. B. Willard—2026

Measurement of circular polarization of resonance-scattered gamma rays following electron capture of Se^{75}, F. Boehm and C. J. Gallagher, Jr.—258

9.0-Mev γ-emitting level in C^{12}, D. E. Alburger and R. E. Pixley—1970

Nuclear spectroscopy of neutron-deficient Lu, Ta, and Re isotopes, B. Harmatz, T. H. Handley, and J. W. Mihelich—1345

Nuclear structure effects in Cs^{135}, M. K. Ramaswamy—2021

Odd-even dependence of nuclear level density parameters, R. E. Bullock and R. G. Moore, Jr.—721

Radioactive decay of Tm^{165}, R. G. Wilson and M. L. Pool —262

Results of stripping analysis of $Co^{59}(d,p)Co^{60}$ reaction, H. A. Enge, D. L. Jarrell, and C. C. Angleman—735

Shape of β spectra of once forbidden transitions in decays of Ga^{73}, La^{140}, Eu^{160}, Eu^{156}, and Sb^{128}, L. M. Langer and D. R. Smith—1308

Single-particle states in deformed nonlocal diffuse boundary potentials, R. H. Lemmer and A. E. S. Green—1043

States of even-even nuclei in near-harmonic region: spectra of Rn^{218}, Rn^{220}, and Rn^{222}, F. S. Stephens, F. Asaro, and I. Perlman—796

Studies of decay schemes in Os-Ir region. II. Decay of 12-day Ir^{190}, W. R. Kane, G. T. Emery, G. Scharff-Goldhaber, and M. McKeown—1953

Study of γ-ray and inner bremsstrahlung transitions in decay of Sn^{119}, Willie E. Phillips and John I. Hopkins —1315

Theoretical predictions for spectra of odd-mass Xe and Te isotopes, Norman K. Glendenning—213

Nuclear Structure Theory (see also **Nuclear Reactions; Nuclear Spectra**)

β-decay theory and spectrum of Rb^{87}, M. A. Preston, G. H. Keech, and J. M. Pearson—305

Calculation of α-transition probabilities, Hans J. Mang—1069

Energy gap in nuclear matter, V. J. Emery and A. M. Sessler—248

Nuclear Structure Theory (Continued)
Monte Carlo calculations of nuclear evaporation processes. III. Applications to low-energy reactions, I. Dostrovsky, Z. Fraenkel, and G. Friedlander—2098(E)
Nonlocal optical model for nucleon-nuclear interactions, P. J. Wyatt, J. G. Wills, and A. E. S. Green—1031
Nuclear structure and simple nuclear reactions, Paul A. Benioff—324
Odd-even dependence of nuclear level density parameters, R. E. Bullock and R. G. Moore, Jr.—721
Perturbation theory applied to nuclear many-body problem, J. S. Levinger, M. Razavy, O. Rojo, and N. Webre—230
Single-particle states in deformed nonlocal diffuse boundary potentials, R. H. Lemmer and A. E. S. Green—1043
Tensor-force effects in odd-odd nuclei, Neal D. Newby, Jr.—747
Theoretical predictions for spectra of odd-mass Xe and Te isotopes, Norman K. Glendenning—213

Optical Instruments (see **Methods and Instruments**)
Optical Properties (see also **Luminescence**)
Decrease of *F*-center photoconductivity upon bleaching, Fred C. Hardtke, Allen E. Scott, and Robert E. Woodley—544
Dependence of optical bleaching rate of x-irradiated KCl crystals on light intensity, W. E. Bron and W. R. Heller—1864
Electrical and optical investigation of absorption centers in rutile single crystals, K. G. Srivastava—516
Electron mobility and scattering processes in AgBr at low temperatures, Dwight C. Burnham, Frederick C. Brown, and Robert S. Knox—1560
Excitons and absorption edge of CdS, D. G. Thomas, J. J. Hopfield, and M. Power—570
Far-infrared energy gap measurements in bulk superconducting In, Sn, Hg, Ta, V, Pb, and Nb, P. L. Richards and M. Tinkham—575
Fundamental lattice dispersion frequencies of NaCl and KCl at 82°K, Marvin Hass—633
Infrared absorption and valence band in InSb, G. W. Gobeli and H. Y. Fan—613
LCAO treatment of exciton structure in alkali halide crystals, R. A. Pappert—525
Optical pumping of He in $^3S_1$ metastable state, F. D. Colegrove and P. A. Franken—680
Paramagnetic resonance and optical spectrum of Fe in beryl, M. Dvir and W. Low—1587
Photoeffect from *L* shell, R. H. Pratt—1619
Photoemission from Si induced by internal electric field, R. E. Simon and W. E. Spicer—621
Radiation effects of bombardment of quartz and vitreous silica by 7.5-kev to 59-kev positive ions, R. L. Hines and R. Arndt—623
Relation between x-ray coloration and optical bleaching of KCl crystals, W. E. Bron—1853
Temperature dependence of optical bleaching of KCl crystals near 0°C, W. E. Bron and A. S. Nowick—114
Transfer of electric charges through rutile single crystals, K. G. Srivastava—520

Pair Production (see **Electrons and Positrons**)
Parity (see **Elementary Particle Interactions; Field Theory; Nuclear Spectra**)
Phosphors and Phosphorescence (see **Luminescence; Semiconductors**)
Photoconductivity (see **Electrical Conductivity and Resistance**)
Photodisintegration (see **Nuclear Photoeffects**)
Photoelasticity (see **Elasticity and Plasticity**)
Photoelectric Effect (see **Electrical Properties**)
Photomagnetoelectric Effect (see **Electrical Conductivity and Resistance**)
Photography and Photographic Emulsions (see **Methods and Instruments; Optical Properties**)
Photons (see **Radiation**)
Photovoltaic Effect (see **Electrical Properties; Semiconductors**)
Piezoelectric Effect (see **Dielectrics and Dielectric Properties; Electrical Properties**)
Plasma Physics (see also **Crystalline State; Electrical Conductivity and Resistance; Electrical Discharges; Fluid Dynamics; Statistical Mechanics and Thermodynamics**)
Boltzmann-Vlasov equation for quantum plasma, Oldwig von Roos—1174
Collision of two plasma streams, W. E. Nexsen, Jr., W. F. Cummins, F. H. Coensgen, and A. E. Sherman—1457
Continuum radiation in x ray and visible regions from magnetically compressed plasma (Scylla), F. C. Jahoda, E. M. Little, W. E. Quinn, G. A. Sawyer, and T. F. Stratton—843
Electrical and thermal currents in slightly ionized gas, Mahendra Singh Sodha—882
Equilibrium properties of partially ionized plasma, Gilda Maki Harris, John Roberts, and John Trulio—1832
Experimental plasma flow into vacuum magnetic cusp field, F. R. Scott and R. F. Wenzel—1187
Microwave conductivity of plasma in magnetic field, Donald C. Kelly—27
Soluble three-dimensional model for Townsend's α, G. W. Stuart and E. Gerjuoy—892
Studies of plasma heated in fast rising axial magnetic field (Scylla), K. Boyer, W. C. Elmore, E. M. Little, W. E. Quinn, and J. L. Tuck—831
Velocity spectrum of protons and tritons from *d-d* reaction in Scylla, D. E. Nagle, W. E. Quinn, F. L. Ribe, and W. B. Riesenfeld—857
Plasticity (see **Elasticity and Plasticity**)
Polarization, Electrical (see **Dielectrics and Dielectric Properties**)
Polymers (see **Molecular Aggregates**)
Positronium (see **Atomic Structure and Spectra; Electrons and Positrons**)
Positrons (see **Electrons and Positrons**)
Probability (see **Mathematical Methods**)
Protons (see **Elementary Particle Interactions**)

Quantum Electrodynamics (see also **Field Theory**)
Boson Furry theorem, D. C. Peaslee and M. T. Vaughn—460
Coupled integral equations for nucleon and pion electromagnetic form factors, M. Baker and F. Zachariasen—438
Decay of μ mesons bound in *K* shell of light nuclei, H. Überall—365
Fine structure of short-lived states of H by microwave-optical method. I, W. E. Lamb, Jr., and T. M. Sanders, Jr.—1901; II, L. R. Wilcox and W. E. Lamb, Jr.—1915
Quantum Mechanics
Analytic wave functions. III. Spin-orbit, spin-other orbit, and spin-spin interactions, R. G. Breene, Jr.—1615
Asymptotic conditions and perturbation theory, K. Nishijima—485
Born cross sections for inelastic scattering of electrons by H atoms. I. $3s$, $3p$, $3d$ states, Gerard C. McCoyd, S. N. Milford, and John J. Wahl—149; II. $4s$, $4p$, $4d$, $4f$ states, Leonard Fisher, S. N. Milford, and Frank R. Pomilla—153

Commutation relations of quantum mechanics, Joseph V. Lepore—821
Dissipation in quantum mechanics. Harmonic oscillator, I. R. Senitzky—670
Fe series Hartree-Fock calculations. II, R. E. Watson—1934
Induced and spontaneous emission in coherent field. III, I. R. Senitzky—1807
Lifetime matrix in collision theory, Felix T. Smith—2098(E)
Photoeffect from L shell, R. H. Pratt—1619
Time-dependent impulse approximation, Saul T. Epstein—458
Upper bounds on electron-atomic H scattering lengths, Leonard Rosenberg, Larry Spruch, and Thomas F. O'Malley—164

Quenching of Radiation (see **Radiation**)

Radiation (see also **Gamma Rays; Range and Energy Loss; X Rays**)
Approximate relativistic Coulomb scattering wave function, W. R. Johnson and C. J. Mullin—1270
Continuum radiation in x ray and visible regions from magnetically compressed plasma (Scylla), F. C. Jahoda, E. M. Little, W. E. Quinn, G. A. Sawyer, and T. F. Stratton—843
Effects of collisions on cyclotron radiation from relativistic particles, Ludwig Oster—1444
Thermodynamics of radiative emission processes, M. A. Weinstein—499

Radioactivity (see also **Nuclear Spectra**)
α decay of Np^{235}, J. E. Gindler and D. W. Engelkemeir—1645
Calculation of α-transition probabilities, Hans J. Mang—1069

Raman Spectra (see **Molecular Structure and Spectra**)

Range and Energy Loss (see also **Scattering**)
Multiple scattering correction for proton ranges and evaluation of L-shell correction and I value for Al, Hans Bichsel and Edwin A. Uehling—1670

Recombination (see **Molecular Structure and Spectra**)

Relativity and Gravitation
Gauge invariance and Lorentz ponderomotive force, Lloyd Motz—1102
Hyperbolic motion in curved space time, W. Rindler—2082
Maximal extension of Schwarzschild metric, M. D. Kruskal—1743

Resistance, Electrical (see **Electrical Conductivity and Resistance**)

Resonance Radiation (see **Radiation**)

Scattering, General (see also **Diffraction; Elementary Particle Interactions; Nuclear Reactions; Range and Energy Loss**)
Charge transfer and electron production in $H^- + H$ collisions, David G. Hummer, R. F. Stebbings, Wade L. Fite, and Lewis M. Branscomb—668
Effect of mutual distortion on phase shifts of colliding systems, Ian C. Percival—159
Elastic scattering of heavy ions by Au and Bi, H. L. Reynolds, E. Goldberg, and D. D. Kerlee—2009
Lifetime matrix in collision theory, Felix T. Smith—2098(E)
Nonlocal optical model for nucleon-nuclear interactions, P. J. Wyatt, J. G. Wills, and A. E. S. Green—1031

Scattering of α Particles and He^3 (see also **Nuclear Reactions Induced by α Particles and He^3**)

Scattering of Atoms and Molecules (see **Atomic and Molecular Beams**)

Scattering of Deuterons and Tritons (see also **Nuclear Reactions Induced by Deuterons and Tritons**)
Elastic scattering of deuterons by He^4, J. L. Gammel, B. J. Hill, and R. M. Thaler—267
Elastic scattering of 13.5- and 15-Mev deuterons by nuclei, Nikola Cindro and N. S. Wall—1340

Scattering of Electrons and Positrons (see also **Electrons and Positrons**)
Angular distribution of secondary electrons from (100) faces of Cu and Ni, Jay Burns—102
Approximate relativistic Coulomb scattering wave function, W. R. Johnson and C. J. Mullin—1270
Born cross sections for inelastic scattering of electrons by H atoms. I. $3s$, $3p$, $3d$ states, Gerard C. McCoyd, S. N. Milford, and John J. Wahl—149; II. $4s$, $4p$, $4d$, $4f$ states, Leonard Fisher, S. N. Milford, and Frank R. Pomilla—153
Collisions of electrons with H atoms. V. Excitation of metastable $2S$ H atoms, R. F. Stebbings, Wade L. Fite, David G. Hummer, and R. T. Brackmann—1939
Cross section for formation of doubly-ionized He by electron impact, H. E. Stanton and J. E. Monahan—711
Dispersion relations in atomic scattering problems, E. Gerjuoy and N. A. Krall—705
Upper bounds on electron-atomic H scattering lengths, Leonard Rosenberg, Larry Spruch, and Thomas F. O'Malley—164
Variational treatment of electron-H atom elastic scattering, Sydney Geltman—1283

Scattering of Mesons and Hyperons (see also **Mesons and Hyperons; Nuclear Reactions Induced by Mesons and Hyperons**)
Charge-exchange scattering of negative pions at 61 Mev and 95 Mev, C. M. York, W. J. Kernan, and E. L. Garwin—1096
Charge-exchange scattering of negative pions at 150 Mev, W. J. Kernan—1092
Depolarization of muon by hyperfine interaction, Elihu Lubkin—815
K^--deuteron scattering and K^--nucleon scattering lengths, T. B. Day, G. A. Snow, and J. Sucher—1100
Magnetic quenching of hyperfine depolarization of positive muons, R. A. Ferrell, Y. C. Lee, and M. K. Pal—2098(E)
Partial-wave dispersion relations for pion-nucleon scattering, William R. Frazer and Jose R. Fulco—1420
Pion-pion scattering and $K^+ \rightarrow 3\pi$ decay, N. N. Khuri and S. B. Treiman—1115
S-wave dominant solutions of pion-pion integral equations, Geoffrey F. Chew, Stanley Mandelstam, and H. Pierre Noyes—478
Theory of low-energy pion-pion interaction, Geoffrey F. Chew and Stanley Mandelstam—467

Scattering of Neutrons (see also **Nuclear Reactions Induced by Neutrons**)
Atomic motions in water by scattering of cold neutrons, D. J. Hughes, H. Palevsky, W. Kley, and E. Tunkelo—872
Diffusive motions in water and cold neutron scattering, K. S. Singwi and Alf Sjölander—863
Effects of chemical binding on nuclear recoil, M. S. Nelkin and D. E. Parks—1060
Elastic scattering of fast neutrons by T and He^3, J. D. Seagrave, L. Cranberg, and J. E. Simmons—1981
Lattice dynamics of alkali halide crystals, A. D. B. Woods, W. Cochran, and B. N. Brockhouse—980
Neutron scattering by fluids and law of corresponding states, George H. Vineyard—1150
Scattering of slow neutrons by water, Mark Nelkin—741

Scattering of Protons and Antiprotons (see also **Nuclear Reactions Induced by Protons and Antiprotons**)
Depolarization and time reversal in p-p scattering at 142 Mev, C. F. Hwang, T. R. Ophel, E. H. Thorndike, and Richard Wilson—352
Energy levels of Si isotopes from inelastic proton scattering, R. E. White—767
Ionization and charge transfer in p-H atom collisions, Wade L. Fite, R. F. Stebbings, David G. Hummer, and R. T. Brackmann—663
Polarization of protons scattered from C^{13}, T. A. Tombrello, R. Barloutaud, and G. C. Phillips—761
p-p depolarization at 98 Mev, E. H. Thorndike and T. R. Ophel—362
p-p scattering at 68 Mev, D. E. Young and L. H. Johnston—313
Small-angle p-p scattering at 435 Mev, S. K. Kao, H. Horstman, and G. W. Hinman—381
Scattering of Radiation (see **Gamma Rays; Radiation; X Rays**)
Scintillation Counters (see **Methods and Instruments**)
Secondary Emission (see **Electrical Properties**)
Semiconductors
Adsorption and bonding properties of cleavage surfaces of Bi_2Te_3, D. Haneman—567
Anisotropic conduction in nonstoichiometric rutile (TiO_2), Lewis E. Hollander, Jr., and Patricia L. Castro—1882
Auger electron ejection from Ge and Si by noble gas ions, Homer D. Hagstrum—940
Cascade capture of electrons in solids, Melvin Lax—1502
Comparison of structures of surfaces created in high vacuum by cleaving and by ion bombardment and annealing, D. Haneman—563
Current-carrier transport and photoconductivity in semiconductors with trapping, W. van Roosbroeck—636
Diffusion of Li and Si at high temperatures and isotope effect, E. M. Pell—1014
Diffusion rate of Li in Si at low temperatures, E. M. Pell—1222
Effect of shear on impurity conduction in n-type Ge, H. Fritzsche—1899
Etch pits on dendritic Ge: a clarification, P. J. Holmes—131
Impurity conduction in transmutation-doped p-type Ge, H. Fritzsche and M. Cuevas—1238
Infrared absorption and valence band in InSb, G. W. Gobeli and H. Y. Fan—613
Low-temperature impurity conduction and magnetoresistivity in n-type Ge, P. Csavinszky—1605
Phonon broadening of impurity lines, E. O. Kane—40
Photoconductivity in GaSe-GaS solid solutions, Richard H. Bube and Edward L. Lind—1535
Photoemission from Si induced by internal electric field, R. E. Simon and W. E. Spicer—621
Solubility of flaws in heavily-doped semiconductors, W. Shockley and J. L. Moll—1480
Spectral distribution of photomagnetoelectric effect in Ge: experiment, Frank A. Brand, Andrew N. Baker, and Herbert Mette—922
Surface-dependent $1/f$ noise in Ge, A. U. MacRae and H. Levinstein—62
Trapping and diffusion in surface region of CdS, James J. Brophy—591
Weak-field magnetoresistance in p-type PbTe at room temperature and 77°K, Robert S. Allgaier—554
Shock Waves (see **Fluid Dynamics**)
Solid State (see **Crystalline State**)
Sound (see **Acoustics**)
Spallation (see **Nuclear Reactions**)

Standards (see **Constants, Standards, Units**)
Stark Effect (see **Atomic Structure and Spectra**)
Statistical Mechanics and Thermodynamics
Adiabatic demagnetization and specific heat in ferrimagnets, J. E. Kunzler, L. R. Walker, and J. K. Galt—1609
Analysis of linear cooperative problem as Markoff process, W. W. Mullins—2098(E)
Approach to equilibrium in quantal systems: magnetic resonance, A. Sher and H. Primakoff—178
Boltzmann-Vlasov equation for quantum plasma, Oldwig von Roos—1174
Cluster integrals and ground state of bosons with repulsive interactions, H. A. Gersch and V. H. Smith—886
Comment on paper of Mori on time-correlation expressions for transport properties, Melville S. Green—829
Correction to Debye-Hückel theory, D. L. Bowers and E. E. Salpeter—1180
Entropy and cross-relaxation in spin systems, A. E. Siegman—562
Equation of state of Bose-Einstein system of particles with attractive interactions, Kerson Huang—1129
Fermi surface and some simple equilibrium properties of system of interacting fermions, J. M. Luttinger—1153
Ground and excited states of many-body system with singular interaction, Katuro Sawada—2090
Irreversibility in interacting spin systems, J. Philippot—1803
Lifetime matrix in collision theory, Felix T. Smith—2098(E)
Microwave conductivity of plasma in magnetic field, Donald C. Kelly—27
Neutron scattering by fluids and the law of corresponding states, George H. Vineyard—1150
Possible phase transition in liquid He^3, V. J. Emery and A. M. Sessler—43
Statistical mechanics of liquid He^4, Ryoichi Kikuchi, Harry H. Denman, and Charles L. Schreiber—1823
Theory of adiabatic susceptibility, Tsunenobu Yamamoto—701
Theory of rotational Brownian motion of free rigid body, L. Dale Favro—53
Thermodynamic potentials for systems at negative absolute temperatures, Charles E. Hecht—1443
Thermodynamics of radiative emission processes, M. A. Weinstein—499
Transport coefficients from dissipation in canonical ensemble, Eugene Helfand—1
Statistical Methods (see **Mathematical Methods**)
Strange Particles (see **Elementary Particle Interactions; Mesons and Hyperons**)
Superconductivity
Critical fields of superconducting films, William B. Ittner, III—1591
Energy gap in nuclear matter, V. J. Emery and A. M. Sessler—248
Far-infrared energy gap measurements in bulk superconducting In, Sn, Hg, Ta, V, Pb, and Nb, P. L. Richards and M. Tinkham—575
Gauge invariant formulation of Bardeen-Cooper-Schrieffer theory of superconductivity, T. A. Oliphant and W. Tobocman—502

Properties of some magnetic superconductors, R. M. Bozorth, D. D. Davis, and A. J. Williams—1570
Some studies of superconducting transition in purified Ta, J. I. Budnick—1578

Supersonics (see **Fluid Dynamics**)

Surface Physics
Activation energy for surface migration of W in presence of high electric field, Philip C. Bettler and Francis M. Charbonnier—85
Adsorption and bonding properties of cleavage surfaces of Bi_2Te_3, D. Haneman—567
Angular distribution of secondary electrons from (100) faces of Cu and Ni, Jay Burns—102
Auger electron ejection from Ge and Si by noble gas ions, Homer D. Hagstrum—940
Comparison of structures of surfaces created in high vacuum by cleaving and by ion bombardment and annealing, D. Haneman—563
Surface-dependent $1/f$ noise in Ge, A. U. MacRae and H. Levinstein—62
Surface elastic waves in cubic crystals, Denos C. Gazis, Robert Herman, and Richard F. Wallis—533
Trapping and diffusion in surface region of CdS, James J. Brophy—591

Thermal Conductivity (see **Thermal Properties**)
Thermal Diffusion (see **Diffusion**)
Thermal Expansion (see **Thermal Properties**)

Thermal Properties
Behavior of principal elastic moduli and specific heat at constant volume of KCl at elevated temperatures, Frank D. Enck—1873
Comment on paper of Mori on time-correlation expressions for transport properties, Melville S. Green—829
Effect of uniform compression on Ettingshausen-Nernst effect in Zn at low temperatures, K. S. Balain, C. G. Grenier, and J. M. Reynolds—935
Galvanomagnetic and thermomagnetic potentials in Zn at liquid He temperatures, C. J. Bergeron, C. G. Grenier, and J. M. Reynolds—925
Interpretation of relative thermoelectric phenomena at low temperatures with special consideration of effects of cold work on Cu, W. B. Pearson—549
Phonon scattering in KCl-KBr solid solutions at low temperatures, Wendell S. Williams—1021
Thermal resistance due to point defects at high temperatures, P. G. Klemens—507

Thermal Radiation (see **Radiation**)
Thermionic Emission (see **Electrical Properties**)
Thermodynamics (see **Statistical Mechanics and Thermodynamics**)
Thermoelectric Effect (see **Electrical Properties; Semiconductors**)
Thermoluminescence (see **Luminescence**)
Thermomagnetic Effect (see **Magnetic Properties**)
Total Cross Sections (see **Electrons and Positrons; Nuclear Reactions**)

Units (see **Constants, Standards, Units**)

Van der Waals Forces (see **Molecular Structure and Spectra**)
Viscosity (see **Liquids**)

Wave Mechanics (see **Quantum Mechanics**)
Work Function (see **Electrical Properties**)

X Rays
Continuum radiation in the x-ray and visible regions from a magnetically compressed plasma (Scylla), F. C. Jahoda, E. M. Little, W. E. Quinn, G. A. Sawyer, and T. F. Stratton—843
Electromagnetic signals from nuclear explosions in outer space, Montgomery H. Johnson and Bernard A. Lippmann—827

Astrophysics
Creation of heavy elements by neutron capture on fast time scale, Peter Fong—1388
Atmosphere (see **Geophysics**)
Atomic and Molecular Beams
Atomic beam study of hfs of Tm^{170}, Amado Y. Cabezas and Ingvar Lindgren—920
Atomic g_J values for Ne and A in their metastable $^3P_2$ states; evidence for zero spin of $_{10}Ne^{20}$, A. Lurio, G. Weinreich, C. W. Drake, V. W. Hughes, and J. A. White—153
Hfs of Am^{241}, Richard Marrus, William A. Nierenberg, and Joseph Winocur—1429
Hfs of metastable $^3P_2$ state of Cd^{111} and Cd^{113}, W. Faust, M. McDermott, and W. Lichten—469
Metastable hydrogen molecules, William Lichten—848
Nuclear spins of six neutron-deficient Au isotopes, W. Bruce Ewbank, Lawrence L. Marino, William A. Nierenberg, Howard A. Shugart, and Henry B. Silsbee—1406
Atomic Mass and Abundance
Atomic masses in heavy mass region, V. B. Bhanot, W. H. Johnson, and A. O. Nier—235
Atomic Structure and Spectra
Applicability of Roothaan's SCF theory, S. Huzinaga—866
Atomic beam study of hfs of Tm^{170}, Amado Y. Cabezas and Ingvar Lindgren—920
Atomic g_J values for Ne and A in their metastable $^3P_2$ states; evidence for zero spin of $_{10}Ne^{20}$, A. Lurio, G. Weinreich, C. W. Drake, V. W. Hughes, and J. A. White—153
Born cross sections for inelastic scattering of electrons by H atoms. III. $5s$, $5p$, $5d$, $5f$, $5g$ states, S. N. Milford, John J. Morrissey, and Joseph H. Scanlon—1715
Crystalline field and spin polarization effects on electron densities and magnetic form factors, R. E. Watson and A. J. Freeman—1134
Decay of bound muons, Victor Gilinsky and Jon Mathews—1450
Electron paramagnetic resonance of Eu (II) in single crystals of CdS, Paul C. Dorian—1190
Electron paramagnetic resonance of Mn in TiO_2, Harro G. Andresen—1606

Atomic Structure and Spectra (Continued)
Experiments on charge-changing collisions of Li ionic and atomic beams, S. K. Allison, J. Cuevas, and M. Garcia-Munoz—1266
He wave function in momentum space, M. G. Henderson and Charles W. Scherr—150
Hfs of Am^{241}, Richard Marrus, William A. Nierenberg, and Joseph Winocur—1429
Hfs of hydrogen, deuterium, and tritium, L. Wilmer Anderson, Francis M. Pipkin, and James C. Baird, Jr.—1279
Hfs of metastable $^3P_2$ state of Cd^{111} and Cd^{113}, W. Faust, M. McDermott, and W. Lichten—469
Hfs of 6 $^3P_2$ state of $_{80}Hg^{199}$ and $_{80}Hg^{201}$. Properties of metastable states of Hg, Mark N. McDermott and William L. Lichten—2277(E)
High-frequency region of bremsstrahlung spectrum, R. H. Pratt—1117
Interaction of differently excited like atoms at large distances, Robert S. Mulliken—1674
Ion-atom potential energy functions obtained from kev scattering data, G. H. Lane and E. Everhart—2064
K-electron excitation accompanying K capture in Cs^{121}, N. L. Lark and M. L. Perlman—536
Lower bounds for eigenvalues with application to He atom, Norman W. Bazley—144
Paramagnetic resonance and optical spectra of divalent Fe in cubic fields. I. Theory, W. Low and M. Weger—2277(E)
Paramagnetic resonance spectrum of Mn^{2+} in $ZnSiF_6{:}6H_2O$, $\Delta m = \pm 1$ transition, E. Friedman and W. Low—408
Pulsed-field measurements of large zero-field splittings: V^{3+} in Al_2O_3, S. Foner and W. Low—1585
"Repulsion of energy levels" in complex atomic spectra, Norbert Rosenzweig and Charles E. Porter—1698
Resonance broadening of spectral lines, C. Alden Mead—860
Ritz-Hylleraas solutions of ground state of two-electron atoms involving fractional powers, H. M. Schwartz—483
Theory of hyperfine anomalies of D, T, and He^{3+}, Daniel A. Greenberg and Henry M. Foley—1684
Thomas-Fermi technique for determining wave functions for alkali atoms with excited valence electrons, Harvey J. Brudner and Sidney Borowitz—2053
Unrestricted Hartree-Fock method: electron densities and magnetic form factors for spin polarized Ni^{++}, R. E. Watson and A. J. Freeman—1125
Vacuum polarization effects on energy levels in μ-mesonic atoms, Roy Glauber, William Rarita, and Philip Schwed—609
Zeeman effect of purely cubic field fluorescence line of $MgO{:}Cr^{3+}$ crystals, S. Sugano, A. L. Schawlow, and F. Varsanyi—2045
Auger Effect (see **Atomic Structure and Spectra; Nuclear Spectra; X Rays**)
Aurora (see **Astrophysics; Geophysics**)

Barkhausen Effect (see **Magnetic Properties**)
Biophysics
Boson Theory (see **Field Theory**)
Bremsstrahlung (see **Radiation**)
Broadening of Spectral Lines (see **Atomic Structure and Spectra; Molecular Structure and Spectra; Spectra, General**)

Capture Cross Sections (see **Electrons and Positrons; Nuclear Reactions; Radiation**)
Čerenkov Effect (see **Radiation**)
Chemical Effects and Properties
Chemical Reactions (see **Chemical Effects and Properties**)
Chemiluminescence (see **Luminescence**)
Cold Emission (see **Electrical Properties**)
Colloids (see **Chemical Effects and Properties; Molecular Aggregates**)
Compton Effect (see **Radiation**)
Conductivity, Electrical (see **Electrical Conductivity and Resistance**)
Conductivity, Thermal (see **Thermal Properties**)
Constants, Standards, Units
Cosmic Radiation (see also **Mesons and Hyperons**)
Energy determination of heavy primaries in nuclear emulsion, P. L. Jain—293
Slow-neutron intensity at high balloon altitudes, R. C. Haymes and S. A. Korff—1460
Cosmology (see **Astrophysics; Relativity and Gravitation**)
Coulomb Excitation (see **Nuclear Reactions; Nuclear Spectra**)
Critical Potentials (see **Atomic Structure and Spectra; Molecular Structure and Spectra**)
Cross Section (see **Electrons and Positrons; Nuclear Reactions; Radiation; Scattering**)
Crystal Counters (see **Methods and Instruments**)
Crystalline State (see also **Electrical Properties; Imperfections in Solids; Magnetic Properties; Semiconductors; etc.**)
Band structure of transition metals and their alloys, John B. Goodenough—67
Broadening of Mössbauer line, H. S. Snyder and G. C. Wick—128
Calculation of crystalline field strength: chrome alum, A. J. Freeman and R. E. Watson—1254
Cartesian tensor scalar product and spherical harmonic expansions in Boltzmann's equation, T. Wyatt Johnston—1103; 2277(E)
Color centers in alkaline earth fluorides, D. Messner and A. Smakula—1162
Color centers in Cs halide single crystals, P. Avakian and A. Smakula—2007
Coloration of pure and doped CaF_2 crystals at 20°C and 190°C, W. J. Scouler and A. Smakula—1154
Considerations on propagation and generation of magnetostatic waves and spin waves, P. C. Fletcher and C. Kittel—2004
d bands in cubic lattices. II, Joseph Callaway—731
de Haas-van Alphen effect in graphite between 3 and 85 kgauss, W. J. Spry and P. M. Scherer—826
Dember effect in AgCl, Alvin M. Goodman and George Warfield—1142
Determination of Fermi velocity by high-field tilt effect, Harold N. Spector—1261
Dielectric formulation of quantum statistics of interacting particles, F. Englert and R. Brout—1085
Direct exchange in ferromagnets, R. Stuart and W. Marshall—353
Dispersion relation for spin waves in fcc Co alloy, R. N. Sinclair and B. N. Brockhouse—1638
Dispersion relations for Bloch functions, Peter E. Kaus and W. K. R. Watson—44
Distribution of electrons in CdS crystals, Ganesh P. Mohanty and Leonid V. Azároff—1224
Dynamics of radiation damage, J. B. Gibson, A. N. Goland, M. Milgram, and G. H. Vineyard—1229
Effective mass in gray Sn from Knight shift measurements, W. E. Blumberg and J. Eisinger—1965
Effects of illumination upon NaCl thermoluminescence, A. E. Stoddard—114
Electrical resistivity of heavy rare-earth metals, R. V. Colvin, Sam Legvold, and F. H. Spedding—741
Electron levels in one-dimensional random lattice, H. L. Frisch and S. P. Lloyd—1175
Electron paramagnetic resonance of Mn in TiO_2, Harro G. Andresen—1606

Energy model for edge emission in CdS, L. S. Pedrotti and D. C. Reynolds—1664
Exchange and correlation corrections to electron-phonon interaction, Daniel Hone—1600
Far infrared studies of Bi, W. S. Boyle and A. D. Brailsford—1943
Ferrimagnetic resonance in rare-earth doped YIG: field for resonance, J. F. Dillon, Jr., and J. W. Nielsen—105
Fluorescence and reflection spectra of NaI single crystals, W. J. Van Sciver—1193
Frictional stress acting on moving dislocation in otherwise perfect crystal, Doris Kuhlmann-Wilsdorf—773
General spin wave dispersion relations, R. F. Soohoo—1978
Hall effect and resistivity of Ni-Pd alloys, James A. Dreesen and Emerson M. Pugh—1218
Lattice anharmonicity and optical absorption in polar crystals: I. Linear chain, A. A. Maradudin and R. F. Wallis—442
Low-temperature specific heat of bcc alloys of 3*d* transition elements, C. H. Cheng, C. T. Wei, and P. A. Beck—426
Magnetism and ground-state energy of linear chain. II. Configuration interaction effects, David I. Paul—463
Mechanism for coloration of alkali halides at low temperatures, Clifford C. Klick—760
Method for determining ground-state spin configurations, D. H. Lyons and T. A. Kaplan—1580
Model of exchange-inversion magnetization, C. Kittel—335
Momentum distribution of interacting electron gas, E. Daniel and S. H. Vosko—2041
Momentum distributions of photons from positrons annihilating in alkali halides, A. T. Stewart and N. K. Pope—2033
New method for treating antiferromagnetic ground state, H. L. Davis—789
Nuclear orientation of iodine by electric hfs alignment, C. E. Johnson, J. R. Schooley, and D. A. Shirley—1777
Nuclear resonance absorption in Dy^{161} situated in Dy_2O_3 and DyFe garnet, S. Ofer, P. Avivi, R. Bauminger, A. Marinov, and S. G. Cohen—406
Optical measurement of plasma frequency and $M_{2,3}$ band of Cr, Norman N. Axelrod and M. Parker Givens—1205
Paramagnetic resonance and optical spectra of divalent Fe in cubic fields. I. Theory, W. Low and M. Weger—2277(E)
Photoemission and valence band structure of alkali iodides, H. Philipp, E. Taft, and L. Apker—49
Plasma theory of electron-phonon interaction in metals, Oldwig von Roos—1641
Polarization of edge emission in CdS, R. J. Collins and J. J. Hopfield—840
Positronium decay in molecular substances, Werner Brandt, S. Berko, and W. W. Walker—1289
Quantum mechanical law of corresponding states for Van der Waals solids at 0°K, Newton Bernardes—807
Resonance absorption of nuclear γ rays and dynamics of atomic motions, K. S. Singwi and A. Sjölander—1093
Self-diffusion of Cl ion in NaCl, Neal Laurance—57
Short- and long-range order parameters in disordered solid solutions, J. M. Cowley—1648
Spin susceptibility of electron gas, P. A. Wolff—814
Spin-wave spectrum of YIG, R. L. Douglass—1612
Steady-state distribution function in dilute electron gases, Daniel C. Mattis—52
Study of surface states of diamond and graphite by simple MO-LCAO method, J. Koutecký and M. Tomášek—1212
Surface plasma oscillations of degenerate electron gas, E. A. Stern and R. A. Ferrell—130
Theory of complex refractive index, C. Alden Mead—854
Theory of vacancy annealing in impure metals, A. C. Damask and G. J. Dienes—99
Transport in metals. II. Effect of phonon spectrum and umklapp process at high and low temperatures, M. Bailyn—381
Vacancy-vacancy interaction in Cu, V. G. Weizer and L. A. Girifalco—837
Variational treatment of warm electrons in nonpolar crystals, I. Adawi—118

Diamagnetism (see **Magnetic Properties**)
Dielectrics and Dielectric Properties
Dielectric constant and dielectric loss of TiO_2 (rutile) at low frequencies, Rebecca A. Parker and John H. Wasilik—1631
Electro-optic Kerr effect and polarization reversal in deuterium-doped Rochelle salt, H. H. Wieder and D. A. Collins—725
Ferrielectricity, Charles F. Pulvari—1670
Ferroelectric properties of $BaLi_{2x}Al_{2-2x}F_{4x}O_{4-4x}$, T. G. Dunne and N. R. Stemple—1949
Theory of complex refractive index, C. Alden Mead—854
Diffraction (see also **Scattering**)
Crystalline field and spin polarization effects on electron densities and magnetic form factors, R. E. Watson and A. J. Freeman—1134
Neutron diffraction studies of Cr-modified Mn_4Sb, W. H. Cloud, H. S. Jarrett, A. E. Austin, and E. Adelson—1969
Unrestricted Hartree-Fock method: electron densities and magnetic form factors for spin polarized Ni^{++}, R. E. Watson and A. J. Freeman—1125
Diffusion
Diffusion of *F* center into KCl single crystals, H. Mizuno and M. Inoue—1226
Self-diffusion of Cl ion in NaCl, Neal Laurance—57
Discharge of Electricity in Gases (see **Electrical Discharges**)
Disintegration and Excitation of Nucleus (see **Nuclear Reactions**)
Dynamics (see **Mechanics**)

Elasticity and Plasticity
Elastic constants of β Sn from 4.2°K to 300°K, J. A. Rayne and B. S. Chandrasekhar—1658
Specific heat and elastic constants of NaI at low temperatures, Richard N. Claytor and Billy J. Marshall—332
Theory of compressibility of solid He^4 and He^3 at 0°K, Newton Bernardes—1927
Electrical Breakdown (see **Dielectrics and Dielectric Properties; Electrical Discharges**)
Electrical Conductivity and Resistance (see also **Electrical Properties; Semiconductors; Superconductors**)
Band structure and electron transport of GaAs, H. Ehrenreich—1951
Electrical resistivity of heavy rare-earth metals, R. V. Colvin, Sam Legvold, and F. H. Spedding—741
Electrical structure of PbS films, D. P. Snowden and A. M. Portis—1983
Hall effect and resistivity of Ni-Pd alloys, James A. Dreesen and Emerson M. Pugh—1218
Impurity conduction at low concentrations, Allen Miller and Elihu Abrahams—745
Quadratic deviations from Ohm's law in *n*-InSb, R. J. Sladek—1589
Rf Hall effect in superconductor, G. Dresselhaus and M. S. Dresselhaus—1971
Scattering of conduction electrons by lattice vibrations in Si, Donald Long—2024
Theory of impurity resistance in metals, J. S. Langer—714
Thermally activated point defect migration in Cu, C. J. Meechan, A. Sosin, and J. A. Brinkman—411
Transport in metals. II. Effect of phonon spectrum and umklapp process at high and low temperatures, M. Bailyn—381

Electrical Discharges (see also **Plasma Physics**)
Theoretical study of electron drift velocity in binary gas mixtures with applications to A-CO_2 and A-N_2 mixtures, Martin A. Uman and George Warfield—1542
Electrical Properties (see also **Dielectrics and Dielectric Properties; Electrical Conductivity and Resistance; Semiconductors; Superconductors**)
Band structure and electron transport of GaAs, H. Ehrenreich—1951
de Haas-van Alphen effect in graphite between 3 and 85 kgauss, W. J. Spry and P. M. Scherer—826
Dember effect in AgCl, Alvin M. Goodman and George Warfield—1142
Dependence of secondary electron emission from MgO single crystals on angle of incidence, A. B. Laponsky and N. R. Whetten—801
Electrical structure of PbS films, D. P. Snowden and A. M. Portis—1983
Recombination of electrons and donors in n-type Ge, G. Ascarelli and S. C. Brown—1615
Scattering anisotropies in n-type Si, Donald Long and John Myers—39
Theory of Ettingshausen effect in semiconductors, B. V. Paranjape and J. S. Levinger—437
Thermoelectricity and thermal conductivity in PbS group of semiconductors, Denis Greig—358
Electrodynamics (see **Electromagnetic Theory and Electrodynamics**)
Electroluminescence (see **Luminescence**)
Electrolysis (see **Chemical Effects and Properties**)
Electromagnetic Theory and Electrodynamics (see also **Microwaves**)
Gravitational-electromagnetic coupling and classical self-energy problem, R. Arnowitt, S. Deser, and C. W. Misner—313
Initial value problem of Einstein-Maxwell field, Louis Witten—635
Electron Diffraction (see **Diffraction; Scattering of Electrons and Positrons**)
Electron Optics (see **Electromagnetic Theory and Electrodynamics**)
Electronic Tubes (see **Methods and Instruments**)
Electrons and Positrons (see also **Electromagnetic Theory and Electrodynamics; Elementary Particle Interactions; Scattering of Electrons and Positrons**)
Internal pairs following π^- capture in hydrogen, M. Derrick, J. G. Fetkovich, T. H. Fields, and J. Deahl—1022
Momentum distributions of photons from positrons annihilating in alkali halides, A. T. Stewart and N. K. Pope—2033
Particle creation in electron-electron collisions, F. Calogero and C. Zemach—1860
Positronium decay in molecular substances, Werner Brandt, S. Berko, and W. W. Walker—1289
Electrons, Mobility (see **Ions and Electrons, Mobility**)
Electrons, Scattering of (see **Scattering of Electrons and Positrons**)
Electrons, Secondary (see **Electrical Properties**)
Electrons, Thermionic (see **Electrical Properties**)
Electro-Optical Effects (see **Optical Properties**)
Electrostriction (see **Dielectrics and Dielectric Properties**)
Elementary Particle Interactions, General
Decay asymmetry of Σ^+ and Λ^0 hyperons, Bruce Cork, Leroy Kerth, W. A. Wenzel, James W. Cronin, and R. L. Cool—1000
Diffraction dissociation of beam particles, M. L. Good and W. D. Walker—1857
Generalized angular momentum in many-body collisions, Felix T. Smith—1058
Invariance under antiunitary operators, G. Feinberg—640
Method for determining K^0 spin, Philippe Eberhard and M. L. Good—1442
Possible method for determining parity of cascade hyperon, Saul Barshay—265
Search for evidence of parity nonconservation in K-He interactions, M. M. Block, E. B. Brucker, R. Gessaroli, T. Kikuchi, C. M. Meltzer, A. Pevsner, P. Schlein, R. Strand, H. O. Cohn, E. M. Harth, J. Leitner, A. Minguzzi-Ranzi, L. Monari, and G. Puppi—570
Search for $S=-2$ negative heavy meson in nuclear emulsions, Y. Eisenberg, M. Friedmann, G. Alexander, and D. Kessler—1021
Search for second π^0, W. Selove and M. Gettner—593
Theory of low-energy nucleon-nucleon scattering, M. L. Goldberger, M. T. Grisaru, S. W. MacDowell, and D. Y. Wong—2250
Elementary Particle Interactions, Electromagnetic
Coulomb dissociation of beam particles, M. L. Good and W. D. Walker—1855
Cross section and polarization in photodisintegration of deuteron, M. L. Rustgi, W. Zernik, G. Breit, and D. J. Andrews—1881
Electroproduction of pions from hydrogen and deuterium, Gerald G. Ohlsen—584
Experimental study of magnetic structure of neutron, J. I. Friedman, H. W. Kendall, and P. A. M. Gram—992
High-energy electron-electron scattering, Yung Su Tsai—269
Internal pairs following π^- capture in hydrogen, M. Derrick, J. G. Fetkovich, T. H. Fields, and J. Deahl—1022
Low-energy neutral pion photoproduction in H_2 and He, A. Odian, G. Stoppini, and T. Yamagata—1468
Measurement of γ-ray spectrum from radiative muon decay, C. O. Kim, W. J. Kernan, and C. M. York—983
Particle creation in electron-electron collisions, F. Calogero and C. Zemach—1860
Photoproduction of negative mesons in deuterium, D. H. White, R. M. Schectman, and B. M. Chasan—614
Pion-pion interaction in electromagnetic processes, Laurie M. Brown and Francesco Calogero—653
Proposal for measuring π^0 lifetime by π^0 production in electron-electron or electron-positron collisions, F. E. Low—582
Proton-proton effective-range theory with vacuum polarization, Leon Heller—627
Spin-orbit correlations in $\mu-e$ and e^--e^- scattering, A. O. Barut and C. Fronsdal—1871
Vacuum polarization effects on energy levels in μ-mesonic atoms, Roy Glauber, William Rarita, and Philip Schwed—609
Elementary Particle Interactions, Strong
Associated production in p-p collisions, E. Ferrari—988
Elastic scattering of 5-Bev π^- mesons on hydrogen, Richard G. Thomas, Jr.—1015
Electroproduction of pions from hydrogen and deuterium, Gerald G. Ohlsen—584
Experimental study of magnetic structure of neutron, J. I. Friedman, W. Kendall, and P. A. M. Gram—992
High-energy pion-nucleus scattering, Mirza A. Baqi Bég—1867
Influence of Bose-Einstein statistics on antiproton-proton annihilation process, Gerson Goldhaber, Sulamith Goldhaber, Wonyong Lee, and Abraham Pais—300
Interaction between a pair of K^+ mesons, Saul Barshay—267
Interaction of K^+ mesons with emulsion nuclei; K^+ energy range 140–375 Mev, B. Sechi Zorn and G. T. Zorn—1898
Internal pairs following π^- capture in hydrogen, M. Derrick, J. G. Fetkovich, T. H. Fields, and J. Deahl—1022

$K\pi$ interaction in double dispersion representation, Benjamin W. Lee—325
Low-energy neutral pion photoproduction in H_1 and He, A. Odian, G. Stoppini, and T. Yamagata—1468
Method for determining K^0 spin, Philippe Eberhard and M. L. Good—1442
Multiple meson production in nucleon-antinucleon annihilations, LeRoy F. Cook, Jr., and Joseph V. Lepore—1028
Nucleon-nucleon spin-orbit interaction and repulsive core, G. Breit—287
Photoproduction of negative mesons in deuterium, D. H. White, R. M. Schectman, and B. M. Chasan—614
Pion-nucleon scattering in Mandelstam representation, S. C. Frautschi and J. D. Walecka—1486
Pion production from $\pi^- \text{-} p$ collisions in long-range interaction model, Freda Salzman and George Salzman—599
Positive pion production in $p \text{-} p$ collisions at 420 Mev with polarized protons, Robert H. March—1874
Possible method for determining parity of cascade hyperon, Saul Barshay—265
Proposal for measuring π^0 lifetime by π^0 production in electron-electron or electron-positron collisions, F. E. Low—582
Proton-proton effective-range theory with vacuum polarization, Leon Heller—627
Quasi-elastic $p \text{-} p$ scattering at 158 Mev, B. Gottschalk and K. Strauch—1005
Search for evidence of parity nonconservation in K-He interactions, M. M. Block, E. B. Brucker, R. Gessaroli, T. Kikuchi, C. M. Meltzer, A. Pevsner, P. Schlein, R. Strand, H. O. Cohn, E. M. Harth, J. Leitner, A. Minguzzi-Ranzi, L. Monari, and G. Puppi—570
Search for $S=-2$ negative heavy meson in nuclear emulsions, Y. Eisenberg, M. Friedmann, G. Alexander, and D. Kessler—1021
Search for second π^0, W. Selove and M. Gettner—593
Search for Σ^- hyperfragments, R. G. Ammar, N. Crayton, K. P. Jain, R. Levi Setti, J. E. Mott, P. E. Schlein, O. Skjeggestad, and P. K. Srivastava—1914
Theory of low-energy nucleon-nucleon scattering, M. L. Goldberger, T. Grisaru, S. W. MacDowell, and D. Y. Wong—2250
Two-nucleon $\mathbf{L} \cdot \mathbf{S}$ potential in pseudoscalar meson theory, C. K. Iddings and P. M. Platzman—644

Elementary Particle Interactions, Weak
Decay asymmetry of Σ^+ and Λ^0 hyperons, Bruce Cork, Leroy Kerth, W. A. Wenzel, James W. Cronin, and R. L. Cool—1000
Decay of bound muons, Victor Gilinsky and Jon Mathews—1450
Lepton decays of hyperons, D. R. Harrington—1482
Measurement of γ-ray spectrum from radiative muon decay, C. O. Kim, W. J. Kernan, and C. M. York—983
Measurements of spatial asymmetries in decay of polarized neutrons, M. T. Burgy, V. E. Krohn, T. B. Novey, G. R. Ringo, and V. L. Telegdi—1829
Mott-scattering analysis of longitudinal polarization of electrons from Co^{60}, J. S. Greenberg, D. P. Malone, R. L. Gluckstern, and V. W. Hughes—1393
Muon decay in nuclear emulsion at 25 000 gauss, G. R. Lynch, J. Orear, and S. Rosendorff—2277(E)
Pseudoscalar interaction in nuclear β decay, C. P. Bhalla and M. E. Rose—1415

Liquids
Resonance absorption of nuclear γ rays and dynamics of atomic motions, K. S. Singwi and A. Sjölander—1093
Luminescence
Effects of illumination upon NaCl thermoluminescence, A. E. Stoddard—114
Fluorescence and reflection spectra of NaI single crystals, W. J. Van Sciver—1193
Phosphorescence mechanisms. I. Approach and general analysis, C. Billington—697; II. Description of phosphorometer, C. Billington—702; III. Method of analysis, C. Billington—708; IV. Decay rate spectra of ruby, uranium glass, and Mn-activated ZnS, C. Billington—710
Polarization of edge emission in CdS, R. J. Collins and J. J. Hopfield—840
Some optical properties of CdSe single crystals, S. P. Keller and G. D. Pettit—1974
Zeeman effect of purely cubic field fluorescence line of $MgO:Cr^{3+}$ crystals, S. Sugano, A. L. Schawlow, and F. Varsanyi—2045

Magnetic Fields (see **Electromagnetic Theory and Electrodynamics**)
Magnetic Properties
Anisotropic superexchange interaction and weak ferromagnetism, Tôru Moriya—91
Band structure of transition metals and their alloys, John B. Goodenough—67
Considerations on propagation and generation of magnetostatic waves and spin waves, P. C. Fletcher and C. Kittel—2004
Cross relaxation in dilute paramagnetic systems, A. Kiel—137
Direct exchange in ferromagnets, R. Stuart and W. Marshall—353
Dispersion relation for spin waves in fcc Co alloy, R. N. Sinclair and B. N. Brockhouse—1638
Equation of state and phase transition of spherical lattice gas, Walter Pressman and Joseph B. Keller—22
General spin wave dispersion relations, R. F. Soohoo—1978
Kinetics of magnetic annealing in Co-substituted magnetite, Wilfred Palmer—342
Linear decrease in magnetocrystalline anisotropy, C. Abraham and A. Aharoni—1576
Magnetic susceptibility of *p*-type Ge, R. Bowers and Y. Yafet—62
Magnetic susceptibility of TiO_2, Frank E. Senftle, Titus Pankey, and Frank A. Grant—820

Magnetism and ground-state energy of linear chain. II. Configuration interaction effects, David I. Paul—463
Method for determining ground-state spin configurations, D. H. Lyons and T. A. Kaplan—1580
Model of exchange-inversion magnetization, C. Kittel—335
Neutron diffraction studies of Cr-modified Mn_3Sb, W. H. Cloud, H. S. Jarrett, A. E. Austin, and E. Adelson—1969
New method for treating antiferromagnetic ground state, H. L. Davis—789
Nuclear resonance absorption in Dy^{161} situated in Dy_2O_3 and DyFe garnet, S. Ofer, P. Avivi, R. Bauminger, A. Marinov, and S. G. Cohen—406
Nuclear Zeeman effect in Sn^{119}, S. S. Hanna, L. Meyer-Schützmeister, R. S. Preston, and D. H. Vincent—2211
Paramagnetic behavior of polycrystalline Sm from 300°K to 1400°K, Sigurds Arajs—756
Spin susceptibility of electron gas, P. A. Wolff—814
Spin-wave spectrum of YIG, R. L. Douglass—1612
Sublattice magnetization and resonance frequency of antiferromagnets with large uniaxial anisotropy, Bernard R. Cooper—1171
Value of g' for supermalloy, G. G. Scott—331

Magnetic Resonance (see **Nuclear Moments and Spin**)
Atomic beam study of hfs of Tm^{170}, Amado Y. Cabezas and Ingvar Lindgren—920
Atomic g_J values for Ne and A in their metastable $^3P_2$ states; evidence for zero spin of $_{10}Ne^{20}$, A. Lurio, G. Weinreich, C. W. Drake, V. M. Hughes, and J. A. White—153
Cross relaxation in dilute paramagnetic systems, A. Kiel—137
Effective mass in gray Sn from Knight shift measurements, W. E. Blumberg and J. Eisenger—1965
Electron paramagnetic resonance of Eu (II) in single crystals of CdS, Paul C. Dorian—1190
Electron paramagnetic resonance of Mn in TiO_2, Harro G. Andresen—1606
Ferrimagnetic resonance in rare-earth doped YIG: field for resonance, J. F. Dillon, Jr., and J. W. Nielsen—105
Hfs of Am^{241}, Richard Marrus, William A. Nierenberg, and Joseph Winocur—1429
Hfs of hydrogen, deuterium, and tritium, L. Wilmer Anderson, Francis M. Pipkin, and James C. Baird, Jr.—1279
Hfs of metastable $^3P_2$ state of Cd^{111} and Cd^{113}, W. Faust, M. McDermott, and W. Lichten—469
Hfs of 6 $^3P_2$ state of $_{80}Hg^{199}$ and $_{80}Hg^{201}$. Properties of metastable states of Hg, Mark N. McDermott and William L. Lichten—2277(E)
Magnetic resonance determination of nuclear moment of Ta^{181} in $KTaO_3$, Lawrence H. Bennett and J. I. Budnick—1812
Metastable hydrogen molecules, William Lichten—848
Nuclear quadrupole resonance in superconducting Ga, R. H. Hammond and W. D. Knight—762
Nuclear resonance absorption in Dy^{161} situated in Dy_2O_3 and DyFe garnet, S. Ofer, P. Avivi, R. Bauminger, A. Marinov, and S. G. Cohen—406
Nuclear spin relaxation in liquid He^3, F. J. Low and H. E. Rorschach—1111
Nuclear spins of six neutrons-deficient Au isotopes, W. Bruce Ewbank, Lawrence L. Marino, William A. Nierenberg, Howard A. Shugart, and Henry B. Silsbee—1406
Paramagnetic resonance and optical spectra of divalent Fe in cubic fields. I. Theory, W. Low and M. Weger—2277(E)
Paramagnetic resonance spectrum of Mn^{2+} in $ZnSiF_6{:}6H_2O$, $m=\pm1$ transition, E. Friedman and W. Low—408
Pulsed-field measurements of large zero-field splitting: V^{3+} in Al_2O_3, S. Foner and W. Low—1585
Selective spin excitation and relaxation in nuclear quadrupole resonance, M. J. Weber and E. L. Hahn—365
Sublattice magnetization and resonance frequency of antiferromagnets with large uniaxial anisotropy, Bernard R. Cooper—1171

Neutrons (see **Elementary Particle Interactions**)
Noise
Measurement of thermal fluctuations in radiation, Martin Harwit—1551
Nuclear Fission
Angular distribution of fragments in fission induced by Mev neutrons, J. E. Simmons and R. L. Henkel—198
Fission of Au by C ions, Glen E. Gordon, Almon E. Larsh, Torbjørn Sikkeland, and Glenn T. Seaborg—1341
Fission of Au^{197} and Bi^{209} by C^{12} and O^{16} projectiles, Harold C. Britt and Arthur R. Quinton—1768
Fission of Ra by 11- to 22-Mev protons, Robert L. Wolke—543
Recoil properties of fission products, John M. Alexander and M. Francis Gazdik—874
Nuclear Forces (see **Elementary Particle Interactions; Field Theory; Nuclear Structure Theory**)
Nuclear Induction (see **Magnetic Resonance; Nuclear Moments and Spin**)
Nuclear Isomers (see **Nuclear Spectra; Radioactivity**)
Nuclear Moments and Spin (see also **Nuclear Spectra**)
Atomic beam study of hfs of Tm^{170}, Amado Y. Cabezas and Ingvar Lindgren—920
Atomic g_J values for Ne and A in their metastable $^3P_2$ states; evidence for zero spin of $_{10}Ne^{20}$, A. Lurio, G. Weinreich, C. W. Drake, V. M. Hughes, and J. A. White—153
Hfs of Am^{241}, Richard Marrus, William A. Nierenberg, and Joseph Winocur—1429
Magnetic resonance determination of nuclear moment of Ta^{181} in $KTaO_3$, Lawrence H. Bennett and J. I. Budnick—1812
Nuclear orientation of Mn^{54} and Mn^{52m}, Rudolf W. Bauer, Martin Deutsch, Gordon S. Mutchler, and Donald G. Simons—946
Nuclear orientation of Tb^{160}, C. E. Johnson, J. F. Schooley, and D. A. Shirley—2108
Nuclear spins of six neutron-deficient Au isotopes, W. Bruce Ewbank, Lawrence L. Marino, William A. Nierenberg, Howard A. Shugart, and Henry B. Silsbee—1406
Nuclear Zeeman effect in Sn^{119}, S. S. Hanna, L. Meyer-Schützmeister, R. S. Preston, and D. H. Vincent—2211
Quenching of magnetic moments in nuclei, S. D. Drell and J. D. Walecka—1069
Nuclear Photoeffects
Cross section and polarization in photodisintegration of deuteron, M. L. Rustgi, W. Zernik, G. Breit, and D. J. Andrews—1881
Fine structure in energy spectra of photoprotons from He^4, Carmelo Milone—1302
Interpretation of isomeric cross-section ratios for (n,γ) and (γ,n) reactions, J. R. Huizenga and R. Vandenbosch—1305
Low-energy neutral pion photoproduction in H_2 and He, A. Odian, G. Stoppini, and T. Yamagata—1468
Nuclear $E1$ peak energies, J. H. Carver and D. C. Peaslee—2155
Photoneutron cross sections of Co and Mn, P. A. Flournoy, R. S. Tickle, and W. D. Whitehead—1424
Photoproduction of negative mesons in deuterium, D. H. White, R. M. Schectman, and B. M. Chasan—614
Photoneutron disintegration below giant resonance: Be^9 and C^{13}, N. C. Francis, D. T. Goldman, and E. Guth—2175
Resonance absorption of nuclear γ rays and dynamics of atomic motions, K. S. Singwi and A. Sjölander—1093

Nuclear Reactions, General (see also **Elementary Particle Interactions; Scattering**)
Comparison of Po^{210} α-particle energy with $Li^7(p,n)Be^7$ reaction threshold energy, C. P. Browne, J. A. Galey, J. R. Erskine, and K. L. Warsh—905
Coulomb dissociation of beam particles, M. L. Good and W. D. Walker—1855
Depolarization due to target motion, Albert E. Werbrouck—1463
Evaporation of charged particles from highly excited compound nuclei, W. J. Knox, A. R. Quinton, and C. E. Anderson—2120
Excitation function of reaction $Be^9(Li^7,Li^8)Be^8$, Robert J. Gerbracht and Byron L. Youtz—1738
Inelastic diffraction scattering, E. Rost and N. Austern—1375
Isomeric cross-section ratios for reactions producing isomeric pair $Hg^{197,197m}$, R. Vandenbosch and J. R. Huizenga—1313
Momentum imparted to complex nuclei in high-energy interactions, Norbert T. Porile—572
Preformation factor in emission of complex particles from nuclear reactions, Bernard L. Cohen—925
Survey of tritium-producing nuclear reactions, Jose Gonzalez-Vidal and William H. Wade—1354

Nuclear Reactions Induced by α Particles and He^3 (see also **Scattering of α Particles and He^3**)
$Be^9(\alpha,n)C^{12}$ reaction and parameters of 7.66-Mev state of C^{12}, F. Ajzenberg-Selove and P. H. Stelson—500
(He^4,Be^7) reaction in Mg, Al, Ti, Co, and Cu from threshold to 42 Mev, Richard H. Lindsay—2168
Reaction $C^{12}(\alpha,d)N^{14}$, Bernard G. Harvey and Joseph Cerny—2162
Single and multiple stripping of α particles, M. el Nadi—1360

Nuclear Reactions Induced by Deuterons and Tritons (see also **Scattering of Deuterons and Tritons**)
Absolute (d,α) reaction cross sections of Zr, Mo, Ti, and S, Oswald U. Anders and W. Wayne Meinke—2114
Absolute determination of $O^{16}(d,n)F^{17}$ threshold energy, R. O. Bondelid, J. W. Butler, and C. A. Kennedy—889
Analysis of structure of nuclei from (d,t) reactions, B. J. Raz, B. Zeidman, and J. L. Yntema—1730
Angular correlation study of $Mg^{24}(d,p\gamma)Mg^{25}$ stripping reaction as test of distorted-wave theory, J. P. Martin, K. S. Quisenberry, and C. A. Low, Jr.—492
Angular distributions of $Be^9(d,n)B^{10}$ neutrons, Richard Bardes and George E. Owen—1369
(d,t) reactions on nuclei with $A \approx 60$, B. Zeidman, J. L. Yntema, and B. J. Raz—1723
Endothermic deuteron stripping reactions. I. Stripping near threshold, E. K. Warburton and L. F. Chase, Jr.—2095; II. $C^{13}(d,p_{\gamma\gamma})C^{13*}$ reaction, L. F. Chase, Jr., R. G. Johnson, and E. K. Warburton—2103
γ rays from deuteron stripping reactions, G. R. Satchler and W. Tobocman—2277(E)
Nuclear energy levels of N^{17}, O^{18}, and O^{20}, Nelson Jarmie and M. G. Silbert—914
Reactions $N^{14}(d,n)O^{15}$ (G.S.) and $N^{14}(d,n)O^{15*}$ (6.79 and 6.86 Mev), A. K. Elwyn, J. V. Kane, S. Ofer, and R. Pixley—2207
Survey of tritium-producing nuclear reactions, Jose Gonzalez-Vidal and William H. Wade—1354
$Ti^{46,48}(d,p)Ti^{47,49}$ reactions and $1f_{7/2}^n$ and $1f_{7/2}^{n-1}2p$ configurations, L. H. Th. Rietjens, O. M. Bilaniuk, and M. H. Macfarlane—527

Nuclear Reactions Induced by Mesons and Hyperons (see also **Elementary Particle Interactions; Mesons and Hyperons; Scattering of Mesons and Hyperons**)
Coulomb dissociation of beam particles, M. L. Good and W. D. Walker—1855
Depolarization due to target motion, Albert E. Werbrouck—1463
Diffraction dissociation of beam particles, M. L. Good and W. D. Walker—1857
Interaction of K^+ mesons with emulsion nuclei; K^+ energy range 140–375 Mev, B. Sechi Zorn and G. T. Zorn—1898
Search for evidence of parity nonconservation in K-He interactions, M. M. Block, E. B. Brucker, R. Gessaroli, T. Kikuchi, C. M. Meltzer, A. Pevsner, P. Schlein, R. Strand, H. O. Cohn, E. M. Harth, J. Leitner, A. Minguzzi-Ranzi, L. Monari, and G. Puppi—570
Search for $S=-2$ negative heavy meson in nuclear emulsions, Y. Eisenberg, M. Friedmann, G. Alexander, and D. Kessler—1021
Search for Σ^- hyperfragments, R. G. Ammar, N. Crayton, K. P. Jain, R. Levi Setti, J. E. Mott, P. E. Schlein, O. Skjeggestad, and P. K. Srivastava—1914

Nuclear Reactions Induced by Neutrons (see also **Elementary Particle Interactions; Scattering of Neutrons**)
Angular distribution of fragments in fission induced by Mev neutrons, J. E. Simmons and R. L. Henkel—198
Creation of heavy elements by neutron capture on fast time scale, Peter Fong—1388
Interpretation of isomeric cross-section ratios for (n,γ) and (γ,n) reactions, J. R. Huizenga and R. Vandenbosch—1305
Measurement of $O^{16}(n,p)N^{16}$ cross section at 14.7 Mev, James A. DeJuren and Robert W. Stooksberry—901
Neutron total cross sections in 17- to 29-Mev region, J. M. Peterson, A. Bratenahl, and J. P. Stoering—521
$Ni^{58}(n,p)Co^{58}$ cross section for neutrons of energies between 2.2 and 3.6 Mev, L. González, J. Rapaport, and J. J. van Loef—1319
Parameters of some low-energy neutron resonances in Pt, John R. Waters—2090
Radiative capture cross sections for fast neutrons, B. C. Diven, J. Terrell, and A. Hemmendinger—556
Slow neutron resonance spectroscopy II. Ag, Au, Ta, J. S. Desjardins, J. L. Rosen, W. W. Havens, Jr., and J. Rainwater—2214

Nuclear Reactions Induced by Protons and Antiprotons (see also **Elementary Particle Interactions; Scattering of Protons and Antiprotons**)
Absolute measurement of $T^3(p,n)He^3$ reaction threshold energy and n-H mass difference, R. O. Bondelid, J. W. Butler, Achilles del Callar, and C. A. Kennedy—887
Comparison of Po^{210} α-particle energy with $Li^7(p,n)Be^7$ reaction threshold energy, C. P. Browne, J. A. Galey, J. R. Erskine, and K. L. Warsh—905
Coulomb dissociation of beam particles, M. L. Good and W. D. Walker—1855
Coulomb excitation of states in Th^{232} and U^{238}, F. K. McGowan and P. H. Stelson—1803
Diffraction dissociation of beam particles, M. L. Good and W. D. Walker—1857
Experimental study of mechanism of (p,t) reactions at 22 Mev, J. B. Ball and C. D. Goodman—488
Fission of Ra by 11- to 22-Mev protons, Robert L. Wolke—543
γ rays from proton bombardment of natural Si, L. W. Seagondollar, Gale I. Harris, and L. Kasturi Rangan—251
Momentum imparted to complex nuclei in high-energy interactions, Norbert T. Porile—572
Radiative capture of protons by F^{19} at bombarding energy of 669 kev, J. V. Kane, R. E. Pixley, and D. H. Wilkinson—952

Nuclear Reactions Induced by Protons and Antiprotons (Continued)
Redetermination of (p,γ) resonant energies used as fixed points on high-energy scale, S. E. Hunt, R. A. Pope, D. V. Freck, and W. W. Evans—1740
Survey of tritium-producing nuclear reactions, Jose Gonzalez-Vidal and William H. Wade—1354
Nuclear Scattering (see **Scattering**)
Nuclear Spectra (see also **Nuclear Reactions; Radioactivity**)
$B^{10}(d,p)B^{11}$ reaction and configurations of B^{11}, O. M. Bilaniuk and J. C. Hensel—211
β-γ directional correlation in Rb^{86} and Eu^{152}, H. J. Fischbeck and R. G. Wilkinson—1762
Collective quadrupole effects in light nuclei, B. James Raz—169
Coulomb excitation of states in Th^{233} and U^{233}, F. K. McGowan and P. H. Stelson—1803
Decay of Ag^{104} and levels in Pd^{104}, H. Nutley and J. B. Gerhart—1815
Decay of Pm^{149} (53 hr), L. C. Schmid and S. B. Burson—158
Decay of Si^{29}, E. L. Robinson and O. E. Johnson—1321
Decay scheme of Dy^{159}, R. C. Greenwood and E. Brannen—1411
Disintegration of Te^{119}, C. W. Kocher, Allan C. G. Mitchell, C. B. Creager, and T. D. Nainan—1348
Double β decay. II, Lothar Meichsner—552
Energy levels of He^6 and Li^6, L. D. Pearlstein, Y. C. Tang, and K. Wildermuth—224
Energy levels of Ne^{22} and Ne^{23}, Joan M. Freeman—1436
Evidence for statistical model obtained from (p,π) spectra of odd-even elements, V, Mn, Co, Nb, Rh, and In, Richard D. Albert, John D. Anderson, and Calvin Wong—2149
γ rays from Ga^{65} decay and half-life of 54-kev level of Zn^{65}, L. S. August, and J. F. Friichtenicht—2072
γ rays from proton bombardment of natural Si, L. W. Seagondollar, Gale I. Harris, and L. Kasturi Rangan—251
γ transitions following decay of Ni^{66}, R. Jambunathan, M. R. Gunye, and Bubulal Saraf—1839
Ground states of odd-odd nuclei, A. de-Shalit and J. D. Walecka—1790
Interpretation of isomeric cross-section ratios for (n,γ) and (γ,n) reactions, J. R. Huizenga and R. Vandenbosch—1305
Isomeric cross-section ratios for reactions producing isomeric pair $Hg^{197,197m}$, R. Vandenbosch and J. R. Huizenga—1313
Isomers of Am^{242}, F. Asaro, I. Perlman, J. O. Rasmussen, and S. G. Thompson—934
K-electron capture branch of Sr^{87m}, A. W. Sunyar and M. Goldhaber—871
K-electron excitation accompanying K capture in Cs^{131}, N. L. Lark and M. L. Perlman—536
L/K-capture ratio and E_L/E_K for Ar^{37}, A. G. Santos-Ocampo and D. C. Conway—2196
Level structure of Eu^{152}, R. E. Sund and M. L. Wiedenbeck—1792
Lifetimes of first excited states of F^{17} and O^{17}, J. V. Kane, R. E. Pixley, R. B. Schwartz, and A. Schwarzschild—162
Lifetimes of rotational levels in some odd-A nuclei measured by microwave method, A. E. Blaugrund, Y. Dar, and G. Goldring—1328
Mott-scattering analysis of longitudinal polarization of electrons from Co^{60}, J. S. Greenberg, D. P. Malone, R. L. Glackstern, and V. W. Hughes—1393
New nuclide, Kr^{74}, J. H. Gray, III, H. L. Hamester, and A. A. Caretto, Jr.—977
Nuclear energy levels of N^{17}, O^{18}, and O^{20}, Nelson Jarmie and M. G. Silbert—914
Nuclear excitation by scattering of 40-Mev electrons, W. C. Barber, F. Berthold, G. Fricke, and F. E. Gudden—2081
Nuclear orientation of iodine by electric hfs alignment, C. E. Johnson, J. F. Schooley, and D. A. Shirley—1777
Nuclear resonance fluorescence in Cu^{65}: lifetimes of excited states and slowing down of recoils (3–100 ev) in condensed media, J. B. Cumming, A. Schwarzschild, A. W. Sunyar, and N. T. Porile—2128
Nuclear spin and moments of 14-hr Ga^{72}, W. J. Childs, L. S. Goodman, and L. J. Kieffer—2138
Nuclear structure of $_{48}Sn^{120}$, H. Ikegami—2185
Pseudoscalar interaction in nuclear β decay, C. P. Bhalla and M. E. Rose—1415
Radiative capture of protons by F^{19} at bombarding energy of 669 kev, J. V. Kane, R. E. Pixley, and D. H. Wilkinson—952
Radioactive decay of Lu^{170}, R. G. Wilson and M. L. Pool—980
Radioactive decay of Lu^{171} and level schemes for Yb^{171} and Yb^{169}, R. G. Wilson and M. L. Pool—1827
Radioactive decay of Pm^{148}, Pm^{144}, and Pm^{146}, E. G. Funk, Jr., J. W. Mihelich, and C. F. Schwerdtfeger—1781
Radioactive decay of Tm^{164} and Tm^{162}, R. G. Wilson and M. L. Pool—1843
Radioactive decay of Yb^{167}, R. G. Wilson and M. L. Pool—1296
Rare $E2$ transition in C^{12}, R. E. Pixley, J. V. Kane, and D. H. Wilkinson—943
Resonant scattering of x rays from Mg and Si, Ralph A. Tobin—175
Shell model and Pb^{208}, J. C. Carter, William T. Pinkston, and William W. True—504
Time dependence of resonantly filtered γ rays from Fe^{57}, F. J. Lynch, R. E. Holland, and M. Hamermesh—513
Transition intensities in Tl^{208} β decay, $Bi^{212} \rightarrow Po^{212}$ decay scheme, and Bi^{212} branching ratio, G. Schupp, H. Daniel, G. W. Eakins, and E. N. Jensen—189
Nuclear Structure Theory (see also **Nuclear Reactions; Nuclear Spectra**)
Analysis of structure of nuclei from (d,t) reactions, B. J. Raz, B. Zeidman, and J. L. Yntema—1730
Application of phase space quasi-probability distribution to nuclear shell model, George A. Baker, Jr., Ian E. McCarthy, and Charles E. Porter—254
Approximate calculation of nuclear binding energy, Leonard S. Rodberg and Vigdor L. Teplitz—969
Atomic masses in heavy mass region, V. B. Bhanot, W. H. Johnson, and A. O. Nier—235
Collective quadrupole effects in light nuclei, B. James Raz—169
Coulomb energies of closed-shell nuclei from shell-model wave functions, N. V. V. J. Swamy, V. K. Kembhavi, and D. G. Galgali—2069
Extension of shell model for heavy spherical nuclei, Michel Baranger—957
jj-coupling model in odd-odd nuclei, M. H. Brennan and A. M. Bernstein—927
Nuclear deformation in spheroidal shell model, Kiuck Lee and D. R. Inglis—1298
Parity-nonconserving internucleon potentials. II. Effects in electromagnetic transitions, R. J. Blin-Stoyle—181
Quenching of magnetic moments in nuclei, S. D. Drell and J. D. Walecka—1069
Shell model and Pb^{208}, J. C. Carter, William T. Pinkston, and William W. True—504
$Ti^{48,49}(d,p)Ti^{49,50}$ reactions and $1f_{7/2}^n$ and $1f_{7/2}^{n-2}2p$ configurations, L. H. Th. Rietjens, O. M. Bilaniuk, and M. H. Macfarlane—527
Two-nucleon $\mathbf{L}\cdot\mathbf{S}$ potential in pseudoscalar meson theory, C. K. Iddings and P. M. Platzman—644

Optical Instruments (see **Methods and Instruments**)
Optical Properties (see also **Luminescence**)
Dember effect in AgCl, Alvin M. Goodman and George Warfield—1142
Electro-optic Kerr effect and polarization reversal in deuterium-doped Rochelle salt, H. H. Wieder and D. A. Collins—725
Energy model for edge emission in CdS, L. S. Pedrotti and D. C. Reynolds—1664
Exciton and magneto-optical effect in strained and unstrained Ge, David F. Edwards and Vito J. Lazazzera—420
Far infrared studies of Bi, W. S. Boyle and A. D. Brailsford—1943
Free carrier absorption arising from impurities in semiconductors, S. Visvanathan—379
Free carrier absorption due to polar modes in III–V compound semiconductors, S. Visvanathan—376
Infrared absorption wavelengths for solid LiH and LiD, W. B. Zimmerman and D. J. Montgomery—405
Lattice anharmonicity and optical absorption in polar crystals: I. Linear chain, A. A. Maradudin and R. F. Wallis—442
Microwave modulation of light in paramagnetic crystals, N. Bloembergen, P. S. Pershan, and L. R. Wilcox—2014
Optical constants of Si in region 1 to 10 ev, H. R. Philipp and E. A. Taft—37
Optical measurement of plasma frequency and $M_{2,3}$ band of Cr, Norman N. Axelrod and M. Parker Givens—1205
Paramagnetic resonance and optical spectra of divalent Fe in cubic fields. I. Theory, W. Low and M. Weger—2277(E)
Photoemission and valence band structure of alkali iodides, H. Philipp, E. Taft, and L. Apker—49
Polarization of edge emission in CdS, R. J. Collins and J. J. Hopfield—840
Some optical properties of CdSe single crystals, S. P. Keller and G. D. Pettit—1974

Pair Production (see **Electrons and Positrons**)
Parity (see **Elementary Particle Interactions; Field Theory; Nuclear Spectra**)
Phosphors and Phosphorescence (see **Luminescence; Semiconductors**)
Photoconductivity (see **Electrical Conductivity and Resistance**)
Photodisintegration (see **Nuclear Photoeffects**)
Photoelasticity (see **Elasticity and Plasticity**)
Photoelectric Effect (see **Electrical Properties**)
Photomagnetoelectric Effect (see **Electrical Conductivity and Resistance**)
Photography and Photographic Emulsions (see **Methods and Instruments; Optical Properties**)
Photons (see **Radiation**)
Photovoltaic Effect (see **Electrical Properties; Semiconductors**)
Piezoelectric Effect (see **Dielectrics and Dielectric Properties; Electrical Properties**)
Plasma Physics (see also **Crystalline State; Electrical Conductivity and Resistance; Electrical Discharges; Fluid Dynamics; Statistical Mechanics and Thermodynamics**)
Electron density fluctuations in plasma, E. E. Salpeter—1528
Measurements of temperature and densities in shock-heated H and He plasmas, Wolfgang Wiese, H. F. Berg, and H. R. Griem—1079
Optical measurement of plasma frequency and $M_{2,3}$ band of Cr, Norman N. Axelrod and M. Parker Givens—1205
Plasma theory of electron-phonon interaction in metals, Oldwig von Roos—1641
Surface plasma oscillations of degenerate electron gas, E. A. Stern and R. A. Ferrell—130

Plasticity (see **Elasticity and Plasticity**)
Polarization, Electrical (see **Dielectrics and Dielectric Properties**)
Polymers (see **Molecular Aggregates**)
Positronium (see **Atomic Structure and Spectra; Electrons and Positrons**)
Positrons (see **Electrons and Positrons**)
Probability (see **Mathematical Methods**)
Protons (see **Elementary Particle Interactions**)

Quantum Electrodynamics (see also **Field Theory**)
Decay of bound muons, Victor Gilinsky and Jon Mathews—1450
Imaginary part of Delbrück scattering amplitude, W. Zernik—549
Particle creation in electron-electron collisions, F. Calogero and C. Zemach—1860
Theory of hyperfine anomalies of D, T, and He^{3+}, Daniel A. Greenberg and Henry M. Foley—1684
Vacuum polarization effects on energy levels in μ-mesonic atoms, Roy Glauber, William Rarita, and Philip Schwed—609
Quantum Mechanics
Application of phase space quasi-probability distribution to nuclear shell model, George A. Baker, Jr., Ian E. McCarthy, and Charles E. Porter—254
Elastic and inelastic scattering of electrons from the S states of atomic hydrogen, Kenneth Smith—845
Elastic scattering of protons by He^3 and of neutrons by H^3, M. I. Ali, A. Hossain, M. Islam, and A. Q. Sarker—1851
Electron levels in one-dimensional random lattice, H. L. Frisch and S. P. Lloyd—1175
Generalized angular momentum in many-body collisions, Felix T. Smith—1058
Geometric theory of charge, H. Ekstein—1917
High-frequency region of bremsstrahlung spectrum, R. H. Pratt—1717
Measurement of quantum mechanical operators, Huzihiro Araki and Mutso M. Yanase—622
Quantum mechanical law of corresponding states for Van der Waals solids at 0°K, Newton Bernardes—807
Relation between Dirac and canonical density matrices, with applications to imperfections in metals, N. H. March and A. M. Murray—830
Thomas-Fermi technique for determining wave functions for alkali atoms with excited valence electrons, Harvey J. Brudner and Sidney Borowitz—2053
Quenching of Radiation (see **Radiation**)

Radiation (see also **Gamma Rays; Range and Energy Loss; X Rays**)
High-frequency region of bremsstrahlung spectrum, R. H. Pratt—1717
Imaginary part of Delbrück scattering amplitude, W. Zernik—549
Measurement of thermal fluctuations in radiation, Martin Harwit—1551
Second-difference analysis of bremsstrahlung yield curves, K. N. Geller—2147
Time dependence of resonantly filtered γ rays from Fe^{57}, F. J. Lynch, R. E. Holland, and M. Hamermesh—513
Radioactivity (see also **Nuclear Spectra**)
Comparison of Po^{210} α-particle energy with $Li^7(p,n)Be^7$ reaction threshold energy, C. P. Browne, J. A. Galey, J. R. Erskine, and K. L. Warsh—905
Isomers of Am^{242}, F. Asaro, I. Perlman, J. O. Rasmussen, and S. G. Thompson—934
New nuclide, Kr^{74}, J. H. Gray, III, H. L. Hamester, and A. A. Caretto—977
Raman Spectra (see **Molecular Structure and Spectra**)

Range and Energy Loss (see also **Scattering**)
Effective charge of heavy ions in various media, P. G. Roll and F. E. Steigert—470
Energy loss and effective charge of heavy ions in Al, L. C. Northcliffe—1744
Energy loss measurements for heavy ions in Mylar and polyethylene, Philip E. Schambra, Andrew M. Rauth, and L. C. Northcliffe—1758
Experiments on charge changing collisions of Li ionic and atomic beams, S. K. Allison, J. Cuevas, and M. Garcia-Munoz—1266
Ranges of 7.5- to 52-kev H_2^+, D_2^+, He^+, and Ne^+ Ions in quartz, R. L. Hines—1626
Recoil properties of fission product, John M. Alexander and M. Francis Gazdik—874
Relative ionization of protons near end of their range, Hans Bischsel—1012
Recombination (see **Molecular Structure and Spectra**)
Relativity and Gravitation
Absence of bound states in gravitational field, Asher Peres—1044
Gravitational-electromagnetic coupling and classical self-energy problem, R. Arnowitt, S. Deser, and C. W. Misner—313
Initial value problem of Einstein-Maxwell field, Louis Witten—635
Interior Schwarzschild solutions and interpretation of source terms, R. Arnowitt, S. Deser, and C. W. Misner—321
Measurement of curvature in two-dimensional universe, Eugene P. Wigner—643
Oscillatory character of Reissner-Nordström metric for ideal charged wormhole, John C. Graves and Dieter R. Brill—1507
Remarks on Schrödinger's model of de Sitter space, W. Rindler—1041
Some recent experimental tests of "clock paradox," C. W. Sherwin—17
Resistance, Electrical (see **Electrical Conductivity and Resistance**)
Resonance Radiation (see **Radiation**)

Scattering, General (see also **Diffraction; Elementary Particle Interactions; Nuclear Reactions; Range and Energy Loss**)
Approximate analytic approach to classical scattering problem, Guy W. Lehman and Kenneth A. Shapiro—32
Bounds on scattering phase shifts: static central potentials, Leonard Rosenberg and Larry Spruch—474
Depolarization due to target motion, Albert E. Werbrouck—1463
Determination of forward scattering amplitude from optical-model potential in high-energy limit, R. Lipperheide and D. S. Saxon—1458
Effect of target gas temperature on scattering cross section, Arnold Russek—1536
Energy determination of heavy primaries in nuclear emulsion, P. L. Jain—293
Experiments on charge-changing collisions of Li ionic and atomic beams, S. K. Allison, J. Cuevas, and M. Garcia-Munoz—1266
Imaginary part of Delbrück scattering amplitude, W. Zernik—549
Inelastic diffraction scattering, E. Rost and N. Austern—1375
Ion-atom potential energy functions obtained from kev scattering data, G. H. Lane and E. Everhart—2064
Theory of low-energy nucleon-nucleon scattering, M. L. Goldberger, M. T. Grisaru, S. W. MacDowell, and D. Y. Wong—2250

Scattering of α Particles and He^3 (see also **Nuclear Reactions Induced by α Particles and He^3**)
Inelastic diffraction scattering, E. Rost and N. Austern—1375
Scattering of Atoms and Molecules (see **Atomic and Molecular Beams**)
Scattering of Deuterons and Tritons (see also **Nuclear Reactions Induced by Deuterons and Tritons**)
Scattering of Electrons and Positrons (see also **Electrons and Positrons**)
Born cross sections for inelastic scattering of electrons by H atoms. III. $5s$, $5p$, $5d$, $5f$, $5g$ states, S. N. Milford, John J. Morrissey, and Joseph H. Scanlon—1715
Elastic and inelastic scattering of electrons from S states of atomic hydrogen, Kenneth Smith—845
Electroproduction of pions from H and D, Gerald G. Ohlsen—584
Experimental study of magnetic structure of neutron, J. I. Friedman, H. W. Kendall, and P. A. M. Gram—992
High-energy electron-electron scattering, Yung Su Tsai—269
High-frequency region of bremsstrahlung spectrum, R. H. Pratt—1717
Mott-scattering analysis of longitudinal polarization of electrons from Co^{60}, J. S. Greenberg, D. P. Malone, R. L. Gluckstern, and V. W. Hughes—1393
Nuclear excitation by scattering of 40-Mev electrons, W. C. Barber, F. Berthold, G. Fricke, and F. E. Gudden—2081
Pion-pion interaction in electromagnetic processes, Laurie M. Brown and Francesco Calogero—653
Spin-orbit correlations in μ-e and e^--e^- scattering, A. O. Barut and C. Fronsdal—1871
Surface plasma oscillations of degenerate electron gas, E. A. Stern and R. A. Ferrell—130
Upper bound on total electron scattering cross sections in hydrogen, Nicholas A. Krall and E. Gerjuoy—143
Scattering of Mesons and Hyperons (see also **Mesons and Hyperons; Nuclear Reactions Induced by Mesons and Hyperons**)
Elastic scattering of 5-Bev π^- mesons on hydrogen, Richard G. Thomas, Jr.—1015
High-energy pion-nucleus scattering, Mirza A. Baqi Bég—1867
Pion-nucleon scattering in Mandelstam representation, S. C. Frautschi and J. D. Walecka—1486
Spin-orbit correlations in μ-e and e^--e^- scattering, A. O. Barut and C. Fronsdal—1871
Scattering of Neutrons (see also **Nuclear Reactions Induced by Neutrons**)
Elastic scattering of protons by He^3 and of neutrons by H^3, M. I. Ali, A. Hossain, M. Islam, and A. Q. Sarker—1851
Neutron-proton polarization and differential cross section at 128 Mev, Russell K. Hobbie and Douglas Miller—2201
Scattering of Protons and Antiprotons (see also **Nuclear Reactions Induced by Protons and Antiprotons**)
Associated production in p-p collisions, E. Ferrari—988
Asymmetry in elastic scattering of polarized protons by deuterium, Stewart M. Marcowitz—891
Elastic scattering of protons by He^3 and of neutrons by H^3, M. I. Ali, A. Hossain, M. Islam, and A. Q. Sarker—1851
Measurement of rotation parameter, R, in p-p scattering at 140 Mev, E. H. Thorndike, J. Lefrancois, and Richard Wilson—1819
Nucleon-nucleon spin-orbit interaction and repulsive core, G. Breit—287
Phase-parameter representation of p-p scattering from 9.7 to 345 Mev, G. Breit, M. H. Hull, Jr., K. E. Lassila, and K. D. Pyatt, Jr.—2227

Positive pion production in p-p collisions at 420 Mev with polarized protons, Robert H. March—1874
Proton-proton effective range theory with vacuum polarization, Leon Heller—627
Quasi-elastic p-p scattering at 158 Mev, B. Gottschalk and K. Strauch—1005
Scattering of Radiation (see **Gamma Rays; Radiation; X Rays**)
Scintillation Counters (see **Methods and Instruments**)
Secondary Emission (see **Electrical Properties**)
Semiconductors
Band structure and electron transport of GaAs, H. Ehrenreich—1951
Electrical structure of PbS films, D. P. Snowden and A. M. Portis—1983
Free carrier absorption arising from impurities in semiconductors, S. Visvanathan—379
Free carrier absorption due to polar modes in III-V compound semiconductors, S. Visvanathan—376
Impurity conduction at low concentrations, Allen Miller and Elihu Abrahams—745
Magnetic susceptibility of p-type Ge, R. Bowers and Y. Yafet—62
Microwave Faraday rotation in Si and Ge, J. K. Furdyna and S. Broersma—1995
Optical constants of Si in region 1 to 10 ev, H. R. Philipp and E. A. Taft—37
Quadratic deviations from Ohm's law in n-InSb, R. J. Sladek—1589
Recombination of electrons and donors in n-type Ge, G. Ascarelli and S. C. Brown—1615
Scattering anisotropies in n-type Si, Donald Long and John Myers—29
Scattering of conduction electrons by lattice vibrations in Si, Donald Long—2024
Theory of Ettingshausen effect in semiconductors, B. V. Paranjape and J. S. Levinger—437
Thermal conductivity of Ge from 3°K to 1020°K, Glen A. Slack and C. Glassbrenner—782
Thermoelectricity and thermal conductivity in PbS group of semiconductors, Denis Greig—358
Valley-orbit splitting of Sb in Ge, H. Fritzsche—1120
Variational treatment of warm electrons in nonpolar crystals, I. Adawi—118
Shock Waves (see **Fluid Dynamics**)
Solid State (see **Crystalline State**)
Sound (see **Acoustics**)
Spallation (see **Nuclear Reactions**)
Spark Discharge (see **Electrical Discharges**)
Specific Heat (see **Thermal Properties**)

Spectra, General
Resonance broadening of spectral lines, C. Alden Mead—860
Spectra, Molecular (see **Molecular Structure and Spectra**)
Spectra, Nuclear (see **Nuclear Spectra**)
Spectroscopy Technique (see **Methods and Instruments**)
Spinor Fields (see **Field Theory**)
Standards (see **Constants, Standards, Units**)
Stark Effect (see **Atomic Structure and Spectra**)
Statistical Mechanics and Thermodynamics
Anisotropic fermion gas, G. Wentzel—659
Dielectric formulation of quantum statistics of interacting particles, F. Englert and R. Brout—1085
Distribution functions and quantum statistics, R. U. Ayres—1557
Equation of state and phase transition of spherical lattice gas, Walter Pressman and Joseph B. Keller—22
Inertial moment of large many-fermion systems with repulsive interactions, Ronald M. Rockmore—1933
Irreversible processes in isolated systems, Edward N. Adams—675
Linked-clusters expansion in quantum statistics: petit canonical ensemble, R. Brout and F. Englert—1519
Statistical mechanics for nonideal Bose gas, A. E. Glassgold, A. N. Kaufman, and K. M. Watson—660
Steady-state distribution function in dilute electron gases, Daniel C. Mattis—52
Stochastic equations for nonequilibrium processes, P. M. Mathews, I. I. Shapiro, and D. L. Falkoff—1
Temperature dependence of low-momentum excitations in Bose gas of hard spheres, F. Mohling and M. Morita—681
Thermodynamically equivalent Hamiltonian for some many-body problems, G. Wentzel—1575
Statistical Methods (see **Mathematical Methods**)
Strange Particles (see **Elementary Particle Interactions; Mesons and Hyperons**)
Superconductivity
Critical fields of superconducting Sn, In, and Ta, R. W. Shaw, D. E. Mapother, and D. C. Hopkins—88
Isotope effect in Nb_3Sn, G. E. Devlin and E. Corenzwit—1964
Nuclear quadrupole resonance in superconducting Ga, R. H. Hammond and W. D. Knight—762
Rf Hall effect in superconductor, G. Dresselhaus and M. S. Dresselhaus—1971
Thermal conductivity of pure In, R. E. Jones and A. M. Toxen—1167
Thermodynamically equivalent Hamiltonian for some many-body problems, G. Wentzel—1572
Supersonics (see **Fluid Dynamics**)
Surface Physics
Dependence of secondary electron emission from MgO single crystals on angle of incidence, A. B. Laponsky and N. R. Whetten—801
Study of surface states of diamond and graphite by simple MO-LCAO method, J. Koutecký and M. Tomášek—1212

Thermal Conductivity (see **Thermal Properties**)
Thermal Diffusion (see **Diffusion**)
Thermal Expansion (see **Thermal Properties**)
Thermal Properties
Effect of point imperfections on lattice thermal conductivity, Joseph Callaway and Hans C. von Baeyer—1149
Low-temperature specific heat of bcc alloys of 3d transition elements, C. H. Cheng, C. T. Wei, and P. A. Beck—426
Specific heat and elastic constants of NaI at low temperatures, Richard N. Claytor and Billy J. Marshall—332
Specific heat of Th at high temperatures, Duane C. Wallace—84
Thermal conduction in rotating liquid He II, C. E. Chase—688
Thermal conductivity of Ge from 3°K to 1020°K, Glen A. Slack and C. Glassbrenner—782
Thermal conductivity of pure In, R. E. Jones and A. M. Toxen—1167
Thermal expansion of Al at low temperatures, P. G. Klemens—843
Thermoelectricity and thermal conductivity in PbS group of semiconductors, Denis Greig—358
Transport in metals. II. Effect of phonon spectrum and umklapp process at high and low temperatures, M. Bailyn—381
Thermal Radiation (see **Radiation**)
Thermionic Emission (see **Electrical Properties**)
Thermodynamics (see **Statistical Mechanics and Thermodynamics**)
Thermoelectric Effect (see **Electrical Properties; Semiconductors**)
Thermoluminescence (see **Luminescence**)

Thermomagnetic Effect (see **Magnetic Properties**)
Total Cross Sections (see **Electrons and Positrons; Nuclear Reactions**)

Units (see **Constants, Standards, Units**)

Van der Waals Forces (see **Molecular Structure and Spectra**)
Viscosity (see **Liquids**)

Wave Mechanics (see **Quantum Mechanics**)
Work Function (see **Electrical Properties**)

X Rays
Distribution of electrons in CdS crystals, Ganesh P. Mohanty and Leonid V. Azároff—1224
Resonant scattering of x rays from Mg and Si, Ralph A Tobin—175
